

WELCOME to the 2008/9 **Trend Catalogue**

e have provided routing products, cutters, jigs and accessories to the woodworking market for over half a century. Today our catalogue includes 4000 precision engineered and innovative products, making it the largest range available worldwide.

To maintain our leading position in the Routing market, we constantly develop and improve our ranges. This catalogue includes over 100 new products highlighted on the following two pages. These include key products such as the T4 light duty plunge router; Airshield Pro powered respirator and T50 Impact Driver.

We are also aware of the need to develop our business to meet the changing needs of our customers and the business environment generally. Therefore, we are developing our website to provide easier accessibility to our products by our customers. This is expected to be ready by Autumn 2007.

This new catalogue launches our Environmental Campaign. We have made a partnership with 'Tree Appeal', an organisation that helps responsible organisations reduce their environmental footprint by planting native British broad-leaved trees in the UK and Tree Twinning projects in Africa. We have made a commitment to plant 2000 trees, so there will be a number of exciting Trend Tree Appeal campaigns in the near future.

We thank you for your support and will continue to ensure that you can count on us to offer high quality innovative products for all of your routing and woodworking needs.

We continually strive to provide outstanding service in sales, technical advice and delivery, therefore your continued feedback is vital to us in maintaining these levels of service.

Should you have any comments regarding the content of this catalogue then please do not hesitate to contact myself or one of my colleagues.

Jeff Willcocks Managing Director

For your nearest **Stockist**

CALL 01923 249911

or use our search engine www.trend-uk.com/stockist

All our products are available from stockists around the UK. If your stockist does not have the products you require in stock, they can be supplied through your stockist for next day delivery.

AVAILABLE WORLDWIDE

We have well established distributors worldwide. Please see our website for details. For assistance in obtaining our products overseas or for dealer

enquiries, please contact Jan Hughes.

Tel: 0044(0)1923 249911 Email: hughesj@trendm.co.uk

TECHNICAL SUPPORT

Our Technical Support team, staffed by experienced engineers and former tradesmen, is available for practical advice on cutter selection, setting-up, jig-making and routing techniques. They also offer a leading design service for tooling made to order for specific applications.

For Free Technical Support:

Tel: 0044(0)1923 249911 (8.45am - 5.30pm Mon - Fri) Fax: 0044(0)1923 228657 Email: technical@trendm.co.uk

INDUSTRIAL TOOLING CATALOGUE

Innovative products developed specifically for the Industrial Woodworking market.

Packed with woodworking solutions for the Professional Tradesman.

To order your free catalogues please visit www.trend-uk.com or call 01923 249911.

ROUTING

Full member of the Woodworking Machinery Suppliers Association.

Member of the Saw Doctors Association, the leading trade organisation which promotes excellence in the manufacture and supply of woodworking cutting tools.

we have formed a partnership with Tree Appeal, which is an organisation working with Defra that plants broad leaved trees in the UK and also specific tree planting projects in Africa.

The philosophy of Tree Appeal is to plant and conserve trees within the UK in recognition and appreciation of the environmental and humanitarian benefits that trees deliver to the well being of our valuable planet. We have committed to planting 2000 trees in our first year of partnership and will be launching various campaigns in the near future to achieve that target.

Catalogue and details of your nearest stockist

TCT PRO ROUTER CUTTERS

For the most demanding applications in manufacturing & in the woodworking trades.

Our straights & trimmers use D-Namic Carbide that cuts up to twice further than its nearest competitor.

- Advanced automated grinding improves the carbides resistance to wear.
- Up to 200% longer life when cutting abrasive materials.
- Cleaner cut than other existing carbides.
- Final results & life that makes it the most cost effective carbide today.
- Developed in conjunction with the world's leading carbide manufacturer & is exclusively available from Trend.

HSS PRO ROUTER CUTTERS

Single piece high speed steel tooling. Range comprises of tools for softwood & for the window industry.

- Ground with a very fine edge for superior cut in softwood.
- Window Industry cutters for alloy & plastic extrusions are made from super high speed steel.

270 Lines Pages 74-77

PTFE non-stick coated micrograin TCT router cutters designed for the tradesman.

- Microgranular TC tips with highly ground face for a superior finish.
- Extra long shanks.
- Practical plastic tube storage cases.

100 Lines Pages 78-79

TCT CRAFTPRO ROUTER CUTTERS

Specially designed to meet the needs of the woodworker & tradesman for quality & performance.

- Microgranular Tungsten Carbide tips to ensure a perfect sharpness.
- Highly ground tip face to ensure it maintains its edge.
- PTFE non-stick coating on the body to minimise resin & heat build-up for longer life.

Extra long shanks, ideal for router table use.

400 Lines

Pages 80-96

PROFESSIONAL ROUTER CUTTERS

Our Professional Range tooling is the industry standard for the most demanding applications in the manufacturing and woodworking trades.

ROUTER CUTTER GRADES

Tunasten Tungsten Tungsten Solid Tungsten Carbide Tipped Carbide Cutters Cutters

This grade of cutter has Tungsten Carbide Tips brazed onto a steel body and is designed to cut the most abrasive materials. With careful handling, they will outlast HSS grade cutters by many times under normal conditions. Small sized cutters have a

EN847 Group HW

BURRS & RASPS

These are turned, milled and ground from a solid piece of Tungsten Carbide and provide the greatest durability when used under stress load conditions. They also offer better plunge cutting characteristics than TCT and many more re-sharpenings can be profiling natural timbers, plywood, MDF, chipboard and abrasive plastics such as solid laminate and Coriana obtained from STC tools. Furthermore, They have similar applications to TCT grade cutters. STC rasps can also be used on GRP. EN847 Group SC.

Use TCT for abrasive materials such as chipboard, MDF, plywood, hardwoods and hard plastics.

RAIGHT FLUTED

- Two flutes give a clean finish to the cut edges.
- All cutters are suitable for plunge routers unless stated.
- Cutters above and including 9.5mmØ, have TCT plunge centre tip.
- For cutters with extra long shanks, see 'Pocket Cutters' on page 8.

KEY TO PRODUCT REFERENCES

Prefix S = Solid Tungsten Carbide (STC).

Suffix D = Especially suited for drilling.

Suffix M = Short shank for Makita 3600B & 3612BR, Ryobi & Hitachi routers.

- ★ Solid Carbide insert. Handle small diameter cutters with care & take shallow passes.
- No centre TC tip, so not suitable for plunging abrasive materials.
- w For use with Trend worktop jigs.

Note Diameter dimensions shown in **bold** denote exact size.

available to prevent resin build-See page 189 for full details.

For acrylic cutters see page 15 for full details. see pages 76-77 for full details

Single Flute

- Eccentric single flute cutters.
- Cutters are chosen for fast free cutting, when cutting speed takes preference over finish.
- Cutters with prefix S are Solid Carbide.
- Cutters of 2.0mm diameter and below should have a maximum of 1.0mm depth of cut per pass.
- Small diameter tools must be handled with care to avoid breakage.
- Single flute cutters should not be used in eccentric chucks.
- These cutters have Solid Carbide inserts rather than brazed tips.

A new generation of extended life straight

Pocket Cutters

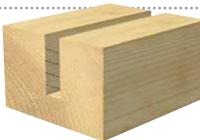

- Single and two flute cutters with extra long shanks.
- All the single flute tools & Refs. 3/20L, 3/55L & 3/84L have recessed shanks to allow deeper cutting.
- Deep grooving, rebating and mortising.
- Useful for template work when thickness of template restricts
- Ref. 3/8L is suitable for use with Trend Hinge Jigs & Lock Jigs.
- ▲ Extra care must be taken to avoid breakage. Take more passes than usual, and only cut up to half the diameter of the cutter in one pass. This applies to cutters under 3/8" diameter.

Down-cut Shear

- Tungsten Carbide Tipped.
- Two flute cutters with a positive shear angle (downcut) for fast cutting and fine finish.
- Ideal for grooving and trimming veneer finishes and laminated boards.
- Down cut feature stops break out on top edge.

3/4	19.1	19.0	51.0	5/3	£20.50

Up-down Shear

- Tungsten Carbide Tipped.
- Two flute cutters with tips sheared up and down, giving a fine finish.
- For trimming veneered and double-faced boards, plywoods and natural timbers.
- These cutters have the action of pushing the chips towards the middle of the board being cut, thus ensuring that the veneers are sheared off cleanly in the process.

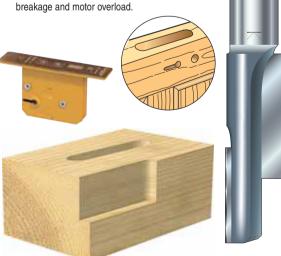

D inch	D mm	C mm	OL mm	Product Ref.	Shank Dia. 1/2"
1/2	12.7	38.1	79.0	14/1	£37.50

Mortiser

- TCT cutters with staggered cutting surfaces.
- Deep mortising and grooving giving good chip clearance.
- For lock mortising, two width cuts will be needed to achieve the standard 19mm mortise.
- The lock mortiser Ref. 5/53 will plunge and clear chips to a depth of 70mm in a number of passes.
- Tools have extra long shanks. Adjust the cutter in the collet to achieve maximum plunge depth.
- For Ref. 5/53 take several passes to avoid cutter

REBATE CUTTERS

- Ease of setting-up and accurate depth of cut.
- Ideal for rebating straight and shaped work pieces.
- Ref. 46/39L has a 60mm shank length to give access to deep rebates.
- Ref. 46/44 is Ideal with delicate applications such as musical instrument production, when a small rebate is required for insertion of purfling.
- When using bearing Ref. B95A, make two passes when a full depth of cut is required by using a larger bearing first.

SPIRAL CUTTERS

Ref. S55/4

irend

Up-cut (Right Hand) Spiral

- Spiral cutters are not only ideal for use in CNC machines and for fixed head routing applications, but can also be used in portable routers.
- Feed rates range from 5 10m/min with speeds of 18,000 - 24,000 RPM.
- Solid Tungsten Carbide, ideal for hardwoods & abrasive material.
- Produces a fine finish. Up-cut prevents burning in plunge cuts.
- Permits high feed speed and allows better chip clearance.

ROTA-TIPTM Replaceable Tips TURGSTEN CARBIDE TIPPED

Shank Diameter

Shank Dia

- Solid Carbide replaceable blades.
- Tool body remains in place when changing blades, thus reducing down-time.
- Straight cutters have blades with two or four cutting edges, allowing them to be rotated and locked in identical positions.
- 1/2" shank tools are ideal for use in production applications.
- Clear economical advantage over conventional brazed tip tooling.

Single Replaceable Blade

- The single blade can be rotated 180° to give double the life of a conventional tool.
- Refs. RT/11, RT/11M & RT/13 are ideally suited for use with Trend Combi worktop jigs.

Ref. RT/13 is ideal for Trend KWJ900 worktop jig.

- Refs. RT/11M & RT/12M have a shorter shank, designed for use with Makita 3600B & 3612BR, Ryobi and Hitachi routers.
- Refs. RT/13 to be used on chipboard only.
- Refs. RT/15, 16, 17, 40 & 41 are suitable for fixed head machines only.

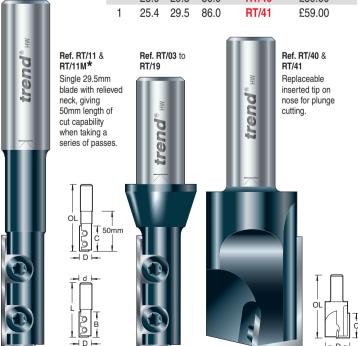

Suitable for plunge cutting.

Two Replaceable Blades

- Refs. RT/21 to RT/24 have blades that can be rotated 180° to give double the life of a conventional tool. Not recommended for plunge cutting unless ramped into workpiece.
- Refs. RT/21 & RT/23 are used for rough cutting only & have staggered blades.
- ▲ Ref. RT/24 should be used in fixed head machines only.
- Refs. RT/50 & RT/51 are plunge tools with a TC tip brazed into nose suitable for plunge cutting & the blades that can be rotated in 90° increments.

trend

not have bevelled ends for

clearance.

Blades are fitted directly onto the tool body without removing the cutter from the router, reducing downtime to a minimum. When replacing blades, please ensure they are placed into the correct seating of the tool body. Ensure the body or slot is free of debris and/or burrs, as this may cause fracture of the blade. Do not overtighten fixing

screws. Run test cuts prior to production to ensure blades are aligned correctly.

STRAIGHTS Special Applications

Acrylic Cutters

- Single flute for fast cutting.
- Two flute for fine finish.
- Cutters with prefix ACR are specially ground for cutting acrylic. Other two flute cutters can be polished for acrylic. Please refer to Trend Technical Department.
- Cutters with prefix S are Solid Carbide and are long lasting for a super fine finish.
- Cutters Ref. ACR2/80 & ACR3/81 can be used on phenolic resin.

Use Trendicote™ to enhance the cutter life and prevent weld back of material to the See page 189 for

full details.

Refs. ACRS2/60, ACRS2/6 & ACR2/80 Single flute for fast cutting.

Refs. ACR3/20, ACRS3/22 & ACR3/81 Two flute straight gives fine finish.

Refs. 46/05 & 07 Two flute mini-trim with guide bearing will profile intricate shapes. Max. 2.0mm trimming.

Ref. S60/1, S60/03 - 06 Up-cut helical gives long lasting super fine finish.

Ref. S60/1LH Down-cut helical gives long lasting super fine finish on fine acrylics. Prevents vibration.

TRIMMERS PROFILERS

Template

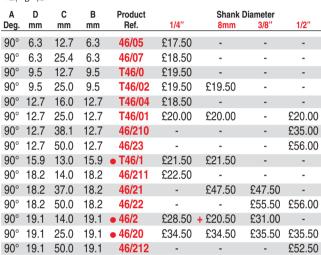

- Self-guiding trimmers with bearings mounted on end of cutters.
- For trimming plastic or plywood overlay.
- For copy profiling, use the bearing to follow a template or base edge of board.
- An approximate 3mm overlap should be left before copy profiling.
- When using plastic laminate always allow laminate adhesive to dry before trimming. This avoids clogging the guide bearing.
- Tool diameters are 0.2mm smaller than bearing diameter.
- Refs. T46/1, 46/2 and 46/20 are downcut to prevent breakout on veneer.
- Ref. 46/211 has a sleeved bearing to allow for regrinds in case of resharpening.

Bearing Guided Combi Jointer Set 876

This Comb Jointing Set can be fitted to all heavy duty routers mounted in a fixed head position. It comprises a set of five 4mm kerf, TCT groovers, mounted on an arbor and three ball bearings. These offer alternative cutting depths and provide a self-quiding facility.

The Comb Jointer is ideally suited for producing small boxes, instrument cases etc.

Please note. Timber ends must be cut square.

Bearing Guided Adjustable Chamfer

This adjustable chamfer set can be used to produce chamfers on the top and bottom edges. The width of timber accommodated by the cutter can be varied by adding spacers above and below the guide bearing. Smaller timber thicknesses can be accommodated by moving the bearing below both blocks. By reversing the positions of the blocks, an alternative angle can be achieved.

OVOLO & ROUNDING OVER

R

D

С

В

B2

Bearing Guided Ovolo & Round Over

Self-guiding cutters for rounding over edges do not require a side fence. They are supplied with two bearings. Use the larger bearing for a round-over. If the cutter is lowered, a top quirk can be produced. A full round/bullnose for stair treads can also be produced by taking a second pass from the opposite side of the workpiece.

PROFILE SCRIBING

CARBIDE

Combination

- The classic method of producing cabinet panelled door and drawer fronts is made easy with these Profile Scriber sets.
- With the combination type, components are rearranged on the arbor to cut the profile or the scribe.
- The Easyset[™] system works by altering the height of the cutter. See opposite page for full details.
- For a range of complimentary panel mould cutters please see pages 53-56 for Raised Panel Moulding.

Easyset™

All in one system for quick setting

- These tools produce the same type of joint & use the same components as the combination PSC sets.
- Both parts of the joint are cut by only changing the cutter height.
- No re-assembly of parts is required to convert the tool from scribing mode to profiling mode & vice-versa.

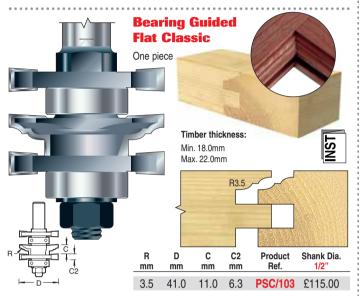

Router table use only.

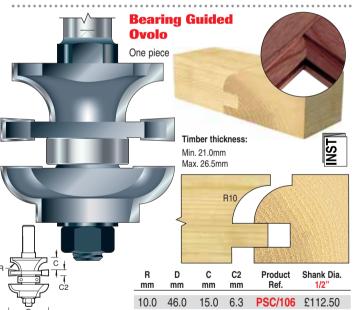

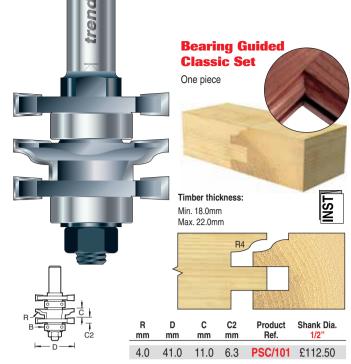

When using PSC sets at the minimum material thickness, the height of the top quirk may be reduced.

Frame & Panel Door Construction

Panelled door frames are made up of two vertical stiles and two horizontal rails. The inside edge of the stiles and rails are grooved to take the panel edge and the rail end tenon.

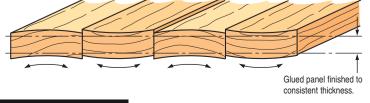

Profile Scribed Joint The end of the rails are cut to form

the joint tenon and scribed to match the decorative rail/stile edge moulding.

composite board. They can be cut as flat panels or with a traditional raised central area (raised and fielded panels) The mould on the panel can vary from a plain bevel to a more elaborate decorative profile.

achieved with the sub-division of horizontal and vertical rails Wide doors normally have at least one central vertical member (muntin) to improve their appearance, provide additional strength and reduce the panels to more manageable sizes.

When joining sections to produce solid wood panels, alternate the growth ring direction of adjacent boards to prevent cupping.

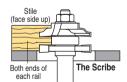

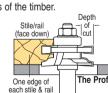

Assembly

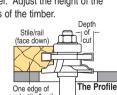

Combination sets consist of an arbor, cutter block, groover and bearing, and are supplied assembled in the scribing mode. The order of these parts will need to be rearranged to convert the tool into the profiling mode. The cutter block and groover should always be assembled at 90° to each other to reduce the cutting impact of the tool. Spare shims are supplied with each set to provide adjustment for the tightness of the joint, this will be required if the tool has been re-sharpened. Full assembly instructions are provided with each set.

The timber of the rails or muntin should be cut square to length and mounted face up in a work-holder or mitre fence to ensure a safe and accurate cut. The back fence should be set level with the bearing guide to automatically give the correct depth of cut. A spelch block, fitted to the work-holder of the mitre fence will prevent break-out of the timber. Adjust the height of the set according to the thickness of the timber.

Pushblock

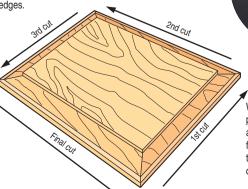

full details

Ref.

See page 144 fo

Cutting the Profile

Switch off the power to the router at the source. Leaving the tool set in the machine, re-assemble the components of the set into the profiling mode. With the sections to be machined face down, machine all profile

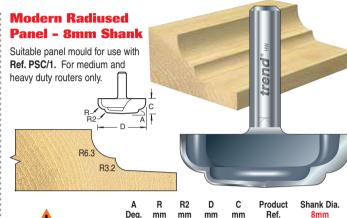

first. Any break out will then be removed when cutting with the grain.

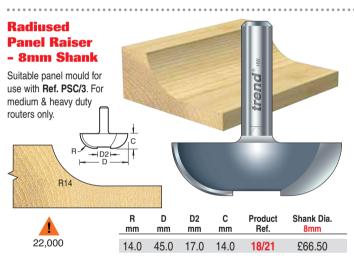

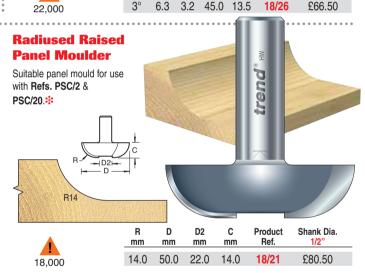

RAISED PANEL MOULDING

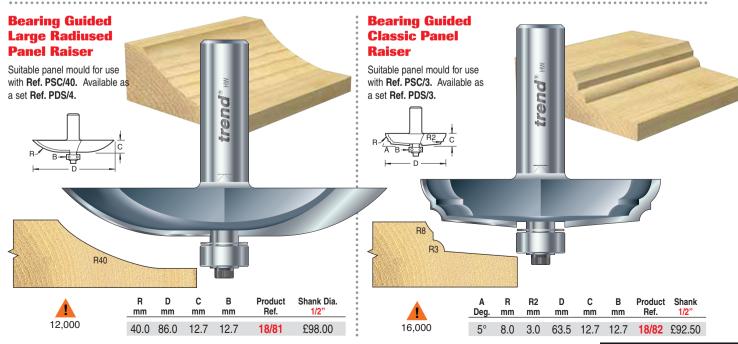

- Machining of traditional panels and frame doors, formerly done on spindle moulders, can now be performed with heavy duty routers mounted in fixed positions, either overhead or inverted.
- These Raised Panel cutters run best at lower speeds and match our range of profile scribers.
- All are suitable for use on natural timber and MDF.
- 8mm shank tools are for use with medium and heavy duty routers only.
- Router table or overhead router use only.
- * See Panel Door Set page 56.

Why use Vertical Panel Mould Cutters?

- When 8mm collet medium duty router is available (with no table).
- When there is no variable speed facility on router.
- Cost of cutter is important.
- Shaped work is not required.

When used in a portable machine the panel will need to be clamped vertically with an extra support base for the router.

PANEL DOOR SETS

Bearing Guided Panel Door Sets

These panel door sets each consist of one profile scriber cutter and a matching bearing guided panel cutter. Details of each cutter can be found on their relevant pages. Two shank sizes are offered either 8mm and 1/2".

1 8mm shank set should only be used with a medium or heavy duty router.

Router table use only.

Please note:

Bearing Guided Biscuit Jointer Set

For biscuit jointing of timber, man-made fibre and particle board with the router. The set includes three sizes of bearing which set the correct depth of cut for the three sizes of biscuit available.

A slightly longer cut than the length of the biscuit is required, to allow some lateral play for easy alignment during assembly. A water based glue (PVA) is used with the biscuits which will expand as the moisture is absorbed. Boards are simply clamped together until glue is cured.

For larger boards, biscuits can be doubled up by making two passes.

Profiles showing cross section of biscuit joints.

Bearing Guided Infinitely Variable 'Quad' Groover

This versatile 1/2" shank groover set offers grooving widths of 3.2mm, 4.0mm, 4.8mm and 6.3mm. It is also infinitely variable from 6.6mm to 18mm in 0.1mm increments. A jointing facility using the bearing is also possible.

Set comprises of four 2 wing groovers with 7.94mm (5/16") bore and an arbor which may be used singly or together to produce a wide range of groove widths. One ball bearing comes as standard.

This set can also be used to tongue and

▲ An initial slot is required

SLOTTING & GROOVING

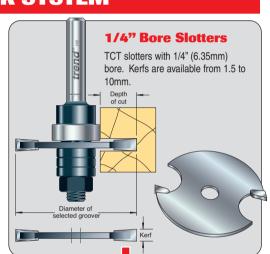

- Applications for these tools include grooving for biscuit jointing, matchlining, tongue and grooving and cutting slots for weather proofing frames and doors.
- All slotters are precision made in TCT grade for long life when cutting the most abrasive materials.

Arbors, slotters & bearings to create customised slotting and grooving tools.

1/4" STACK SYSTEM

Ensure slotters are fitted the correct way onto the arbor with respect to the direction of rotation. Bearings and slotters should be fitted as near to the shank as possible to avoid vibration.

1/4" Bore Bearings

Use of a bearing will govern the depth of cut without the need of a side-fence. The smaller the bearing, the deeper the cut. The chart below shows the depths of cut possible with each size of bearing.

		US	E CHA	RT BE	LOW T	O FINI) DEP1	TH OF	CUT		. 7	ל								- - -	-

M12 THREADED SYSTEM

Heavy Duty Arbors For M12 Bore Slotters

Slotters with M12x1.0mm threaded bore enables flush recessing in the corner such as for weather proofing. Spacers are supplied to ensure the minimal threaded arbor protrudes below the slotter. Arbor 33/20 enables 12mm bore guide bearings to be fitted above slotter for self-guiding work.

WEATHERSEAL Recessing & Seals

irend® 18,000

Aquamac® 21 Recesser Ref. 334 recessing cutter will accommodate the Schlegel® Aquamac® 21 seal. This cutter is designed for use with the Aquamac seal in a wiping mode and comes complete with a guide bearing to reduce setting-up time and simplify machining operations.

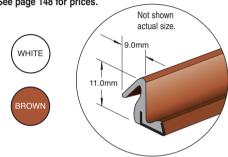

D mm	D2 mm	C mm	C2 mm	B mm	OL mm	Product Ref.	Shank Dia.
46.3	34.3	10.3	2.7	28.6	90.0	334	£96.00

Aquamac® 21 Strip

Aquamac® 21 strip is fitted into the frame rebate (head and jambs) as three cut pieces forming a compression or wiping seal. The seal is butt joined at the corners. To seal the door bottom, Schlegel® weather bar is mounted into the threshold section. It is important that the seal does not abut the weather bar but runs to the threshold section in front (weatherside) of it, to maximise water permeability resistance.

See page 148 for prices.

Aquamac® 63 Recesser

Trend Aquamac® 63 Recessing Sets Ref. 330 and 331 are designed to accommodate the popular Schlegel® Aguamac® 63 weather strip system and allows for a particularly small gap between sash and frame. The slot can be positioned part way down the side of the rebate, or at the bottom of the rebate. Ref. 330 must be used with a side fence, whereas Ref. 331 comes complete with a guide bearing to reduce setting-up time.

Aquamac® 63 Strip

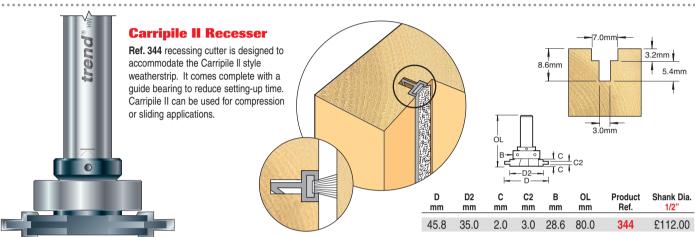

Aquamac® 63 strip is fitted into the frame aperture using four cut lengths. It is important to create tight butt or notched joints to ensure high levels of window performance. Joints can be enhanced by the application of a small amount of silicone mastic. When fitted, it is necessary to notch the seal end.

See page 148 for prices.

INTUMESCENT & Smokeseal Recessing

Intumescent Recesser

- For either frame or door applications, with standard or Smokeseal® Intumescent Strip.
- Neatly cuts grooves on doors or frames to accept Intumescent Strip which enables the formation of effective barriers to both fire and smoke
- Three types available. They are designed for use with seals of 10mm, 15mm or 20mm width and 4mm
- By using alternative ball bearing diameters, other seal thicknesses can be accommodated.

Cutter Set Ref. 346 is used for the grooving of door edges to receive 10mm intumescent strip. The arbor can be lowered or raised to give a wider groove for 20mm strip. Alternatively Ref. 348 can be used for 15mm strip and Ref. 345 can be used for 20mm strip. Choose the alternative bearings shown above to suit other thicknesses of intumescent strip.

CUTTER TYPES

High Speed Steel Cutters

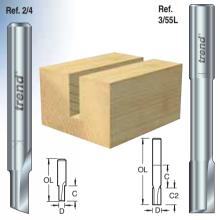

These are made from a single piece of High Speed Steel, ground with a very fine edge. They are only suitable for non-abrasive materials, but will give a superior finish in soft timbers. Generally HSS cutters are slightly less expensive than their TC grades, but can be more suitable for certain applications.

Applications: Routing non-abrasive natural timbers and plastics.

ISSE Super High Speed Steel Cutters

This is a specially developed grade of High Speed Steel, precision

ground to the highest tolerances.
HSSE grade cutters are used for specialised applications, typically in the window industry for machining aluminium and uPVC

Single Flute Straight

For fast free cutting, these HSS cutters have extra clearance.

RADE RANGE ROUTER CUTTERS ®

Individual Trade Range cutters are supplied in tough plastic packaging to provide excellent

Trade Range router cutters have extra long shanks & are specifically designed to meet the demanding needs of the professional tradesmen.

- Feature 2mm micrograin Tungsten Carbide tips, for cutting the most abrasive materials to give extra long life.
- PTFE coated, indicated by distinctive black colouring.
- Can be used on hardwood & softwood, fibreboard, plywood and particle board.
- Etched dimensions on extra long 40mm shanks, for quick identification.

Two Flute Straight

TUNGSTEN

Gives a clean finish to abrasive materials such as chipboard, MDF, plywood and certain hardwoods. For housing, grooving and mortising.

- ★ Solid Carbide insert.
- Centre tip for drilling abrasive material.
- **H** Extra long 70mm OL. Can be used with the Trend Hinge Jig.
- L For use with the Trend Lock Jig.
- w For use with Trend worktop jigs.

Suffix M = Short shank for Makita 3600B, 3612BR, Ryobi & Hitachi routers.

Suffix D = Especially suited for drilling.

KEY TO DRODUCT REFERENCES

Suffix M = Short shank for Makita 3600B & 3612BR, Ryobi & Hitachi routers.

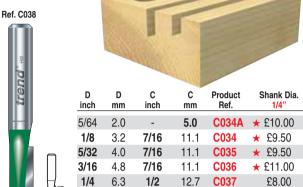

- These cutters have Solid Carbide inserts rather than brazed tips.
- Centre tip for plunge cutting in abrasive materials.
- Extra long shank 70mm overall length suitable for Trend Hinge Jig.
- For use with Trend worktop jigs.

Note Diameter dimensions in bold denote exact size.

Single Flute Straight

- Single fluted Tungsten Carbide straight cutters for fast free cutting.
- Single flutes should be chosen where speed and clearance rates are more important than the finish.

Depth of cut should not exceed cutter diameter.

Mortise & Tenon Cutter Sets

1/4

Set of five long reach straight cutters with diameters of 1/4" to 5/8".

3/4

19.1

25.4

C038

C039

Suitable for use with the Trend Mortise & Tenon Jig.

6.3

6.3

Each set comprises one of each of the individual cutters below.

D inch	D mm	C inch	C mm	Product Ref.

With 1/4" shank	SET/MT1X1/4TC
With 8mm shank	SET/MT1X8MMTC
With 1/2" shank	SET/MT1X1/2TC

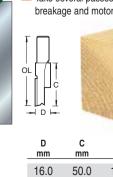

See page 121 for full details.

Irend

- TCT cutter with staggered cutting tips.
- Deep mortising and grooving giving good chip clearance.
- For lock mortising, two width cuts will be needed to achieve the standard 19mm mortise.
- Will plunge and clear chips to a depth of 70mm in a number of passes.
- Take several passes to avoid cutter

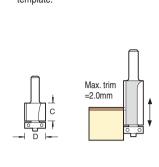

Ref.

C117

TRIMMER CUTTERS

Bearing Guided 90° Trimmers

- Used for trimming plastic or plywood overlays.
- Also for copy profiling with a template.

PROFILE SCRIBING TOOLING

Combination & Easyset™

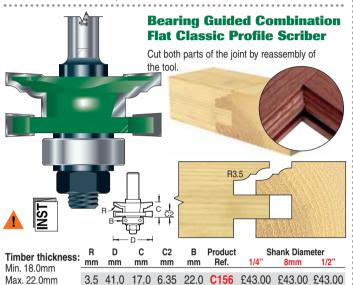

- The classic method of producing cabinet panelled door and drawer fronts is made easy with these Profile Scriber sets.
- With the combination type, components are re-arranged on the arbor to cut the profile or the scribe.
- The Easyset™ system works by altering the height of the

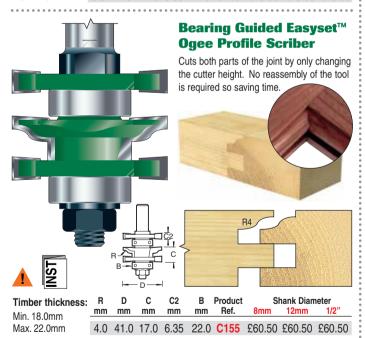

18.000

Instructions supplied

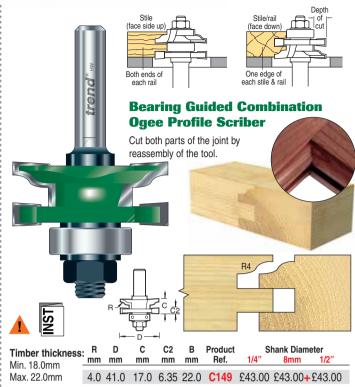

Router table use only. 1/4" and 8mm shanks should only be used with a medium or heavy duty router. For certain routers the aperture in the base may need to be enlarged. A workholding device should be used when cutting the scribe cut on the rail ends. The cutting edges should be staggered to each other. When using Easyset™ cutters take several passes.

PANEL DOOR SETS

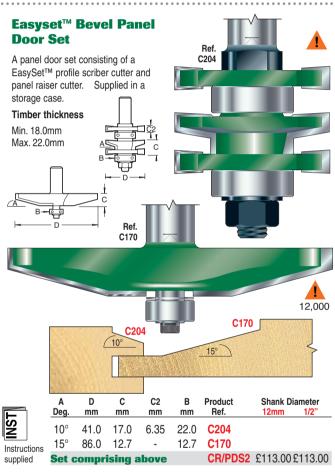

Set comprising above

CR/PDS1 £90.50 £90.50 £90.50

Using Profile Scribing Tooling

Cutting the Scribe

The timber of the rails or muntin should be cut square to length and mounted face up in a work-holder or mitre fence to ensure a safe and accurate cut. The back fence should be set level with the bearing guide to automatically give the correct depth of cut. A spelch block, fitted to work-holder of the mitre fence will prevent break-out of the timber. Adjust the height of the set according to the thickness of the timber.

Cutting the Profile

Switch off the power to the router at the source. Leaving the tool set in the machine, the cutter now needs to be set up in the profiling mode. With the standard sets the components will need to be re-assembled, with the EasySet™ the height will need to be changed. With the sections to be machined face down, machine all profile edges, using a pushstick for final 300mm of cut.

Curved Rails

The top rail can be curved for a decorative effect, using a curved template made from MDF or plywood and a template profiling cutter. The curve on the rail is first sawn oversize using a bandsaw or jigsaw. The curved template is then fitted to the rail and the bearing on the profiling cutter follows the template and trims the component. The curved rail is then moulded as normal.

Profile Scribing Tools & Sets

Profile scriber tools and sets are for router table use only. 1/4" and 8mm shanks should only be used in a medium or heavy duty router. For certain routers the aperture in the base may need to be enlarged. A workholding device should be used when cutting the scribe cut on the rail ends. The cutting edges should be be staggered to each other. When using Easyset™ cutters take several passes.

III BISCUIT JOINTER & SLOTTERS

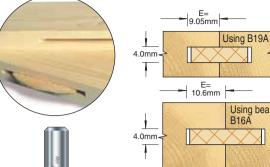

Bearing Guided One Piece Biscuit Jointer

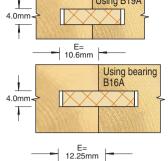

This two wing self-guiding Tungsten Carbide Tipped slotting cutter is ideal for biscuit jointing. The set is supplied with three ball bearing guides to suit the three sizes of biscuits available. A slightly longer cut than the length of the biscuit is required for ease of alignment during assembly.

Aquamac® 21 Strip

Aquamac® 21 strip is fitted into the frame rebate (head and jambs) as three cut pieces forming a compression or wiping seal. The seal is butt joined at the corners. To seal the door bottom, Schlegel® weather bar is mounted into the threshold section. It is important that the seal does not abut the weather bar but runs to the threshold section in front (weatherside) of it, to maximise water permeability resistance.

Aquamac® 63 Strip

Aquamac® 63 strip is fitted into the frame aperture using four cut lengths. It is important to create tight butt or notched joints to ensure high levels of window performance. Joints can be enhanced by the application of a small amount of silicone mastic. When fitted, it is necessary to notch the seal end. 6 55mm

OLLS HOUSE SET

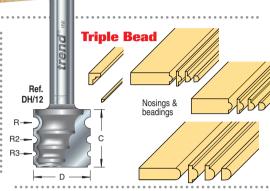

Available in 1/4" & 8mm shanks

Designed to suit dolls house requirements at 1:12 scale & for all types of miniature or small scale work. It is advisable that the router is held inverted in a table with a small aperture in the table & fence. Moulds are machined on a wide piece of stock & then cut off using a mini circular saw. Extra care must be taken when setting-up to ensure the required mould

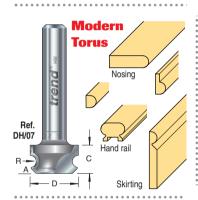

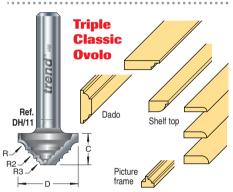

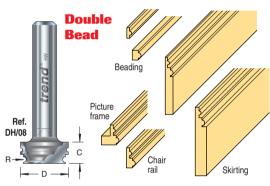

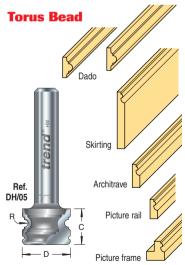

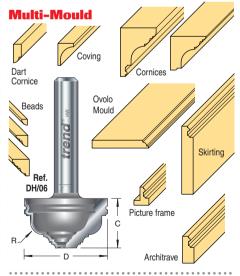

Supplied in a storage box

Replacement Bearings

To order the correct replacement bearing, please use the chart above.

Care and maintenance

Check bearings regularly for free running and replace if faulty.

Bearings are shielded to prevent penetration of dust and grease packed for life. They should not be cleaned with solvent or lubricated as this will dissolve the grease and cause premature bearing failure. Scrape off any resin build-up.

Ref. B182 is sleeved and can be reground.

Always check the tightness of the fixing screw before using cutter.

Collar Packs

Collar Packs are used for cutters with shank mounted bearings. Packs include one collar, grub screw and hex key.

Collar OD	Collar ID	Hex Key	Product Ref.	Price per Pack
11.0mm	1/4"	1/16"	COLL/14	£1.50
14.0mm	8.0mm	5/64"	COLL/8	£1.50
15.8mm	3/8"	1/16"	COLL/38	£1.50
15.0mm	3/8"	1/16"	COLL/38A	£1.50
18.0mm	1/2"	1/16"	COLL/12	£1.50
20.0mm	1/2"	1/16"	COLL/12A	£1.50

Circlips

Sprung steel fasteners to hold bearings in position onto grooved shanks.

Collar ID	Product Ref.	Price per Pack
8.0mm	CIRC/1	£1.00
1/2"	CIRC/2	£1.00

Blade Fixing Screws for Rota-tip™

Always use our replacement screws if those supplied with the tool are lost or need replacement.

SAFETY INFORMATION & CUTTER CARE

Before use to ensure safe working & to get the best from your Trend cutters, read the following safety instructions & cutter care.

Power Tool Safety

- Ensure the power tool is in compliance with 98/37/EC (identified by the CE marking on the power tool).
- Read and understand instructions supplied with power tool, attachment and cutter.

- Always remove the plug from the socket before making any adjustments to the machine.
- Disconnect power tool and attachment from power supply when not in use, before servicing, when making adjustments and when changing accessories such as cutters. Ensure switch is in "off" position and cutter has stopped rotating.

- Do not wear loose clothing. Make sure baggy sleeves are rolled up and ties are removed. Ensure long hair is
- Always trail the cable away from the working area.
- Always keep the area around the work piece and the floor clear of obstacles.
- The level of noise when routing may exceed 85 dB(A) and ear defenders should be worn.
- Always wear eye protection in the form of goggles, safety spectacles or a visor.

- Always wear a respirator or dust protection mask. Dust masks/filters should be changed regularly. Fit dust
- All Personal Protective Equipment (PPE) must meet current UK and EU legislation.
- Trial cuts should be made on waste material before starting any project.
- Always clamp securely the material being machined.
- Never leave the power tool unattended when it is
- Always wait until the spindle stops rotating before making any adjustments.

- Always keep guards in place and in good working order.
- Only use cutting tools for woodworking that meet EN847-1/2 safety standards and any subsequent amendments
- Hand held power tools produce different vibration levels. Always refer to the specifications and relevant Health and Safety Guide.

Routing Safety

- Disconnect machine from power source before carrying out any adjustments.
- Before each use check that the cutting tool is sharp and free from damage. Do not use the cutting tool if it is dull, broken or cracked or if any other damage is noticeable or suspected.
- Keep hands, hair and clothing clear of the cutter.
- Clamping surfaces shall be cleaned to remove dirt, grease, oil and water.
- Tool's shank must be inserted into the router's collet at least all the way to the marked point.
- Tools and tools bodies shall be clamped in such a way that they shall not become loose during operation.
- Care shall be taken when mounting tools to ensure that the clamping is by the shank of the tool and that the cutting edges are not in contact with each other or with

- the clamping elements
- Fastening screws and nuts shall be tightened using the appropriate spanners etc., and to the torque value provided by the manufacturer.
- Extension of the spanner or tightening using hammer blows shall not be permitted.
- Clamping screws shall be tightened according to instructions provided by the manufacturer. Where instructions are not provided, clamping screws shall be tightened in sequence from the centre outwards.
- Cutting tools are sharp. Care should be taken when handling them.
- Check that the cutter is fitted securely in the router
- Always remove spanners and hex keys from the cutter.
- Check before starting to cut, that there are no obstructions in the path of the router. When cutting through the full thickness of the material, ensure there are no obstacles beneath the work piece.
- The direction of routing must always be opposite to the cutters direction of rotation. Do not back-cut or climb-
- Do not switch on the router with the cutter in contact with the work piece and do not feed the cutter into the work piece until it is at full speed.
- Always guide the router with both hands
- When you are finished routing, release the plunge and allow the machine to come to a complete stop.
- Ensure the shank size is compatible with the collet.
- Ensure the cutter can be used safely with the chosen router before use
- When using stacked tooling (multi-blade, block, groover etc.) on a spindle arbor, ensure that the cutting edges are staggered to each other to reduce the cutting
- Feed the router at a constant speed. Too slow a feed speed will result in burning the material and overheating the cutter.
- Never use cutters with a diameter exceeding the maximum diameter indicated in the technical data of the powertool or attachment used.
- Do not take heavy and deep cuts in one pass as this will overload the router
- The motor of a router is susceptible to the accumulation of sawdust and wood chips and should be blown out, or 'vacuumed', frequently to prevent interference with normal motor ventilation.
- In case of excessive vibrations while using the router stop immediately the operation and have the eccentricity of the router cutter and clamping system checked by competent personnel.

Maximum Speed (n.Max)

The maximum speed marked on the tool, or shown in the chart or on the packaging should not be exceeded. Where stated, the speed range should be adhered to. Recommended speeds are shown in our Routing Catalogue, in our instructions and/or on our website.

Using Routers in a Fixed Position

After work, release the router plunge to protect the

- Always use a push-stick or push-block for last 300mm of the cut.
- Whenever possible use a work holding device or jig to secure component being machined.
- Ensure attachment is securely fitted to the workbench, with table surface at approximately hip height.
- Use a No-Volt Release Switch. Ensure it is fixed securely, easily accessible and is used correctly.
- Do not use awkward or uncomfortable hand positions.
- The use of a fine height adjuster is highly recommended (if available for your router) for accurately adjusting the height of the cutter for operations such as dovetailing, or in a fixed head use.
- Do not reach underneath the table or put your hands or fingers at any time in the cutting path while tool is connected to a power supply.

Cutter Care

- Always read the instructions supplied with the router cutter.
- Do not drop cutters or knock them against hard objects.
- Cutter shanks should be inserted into the collet at least 2/3 of shank length. Do not insert shank too far into the collet. Leave about 3mm of shank showing.
- Do not over-tighten the collet nut as this will score the shank and create a weakness. If the shank is marked please discard the cutter.
- Periodically check the router collet and collet nut for wear. A worn distorted collet should be discarded.
- Cutters should be kent sharp to avoid burning and to maintain a good finish on the work piece. Do not use blunt cutters.
- Cutters should be kept clean. Resin build-up should be removed at regular intervals with Resin Cleaner™. The use of a lubricant such as Trendicote™ PTFE spray will help prevent resin build-up.
- Do not take deep cuts in one pass, take several shallow passes to reduce the side load applied to the cutter.
- Very small diameter cutters should be handled and used with care
- Always return the cutter to its packaging after use.
- Always use router cutters in a router. Router cutters must not be used in a drill. Drill and boring bits must not be used in a router. Router cutters must only be used for the material cutting application for which they are designed. Do not use on metal or masonry.

Repair of Tools/Maintenance

- Repair of tools is only allowed in accordance with the manufacturers instructions.
- The design of composite (tipped) tools shall not be changed in the process of repair. Composite tools shall be repaired by a competent person, ie. a person of training and experience, who has knowledge of the design requirements and understands the levels of safety to be achieved.
- Repair shall therefore include e.g. the use of spare parts which are in accordance with the specification of the original parts provided by the manufacturer.
- Tolerances which ensure correct clamping shall be
- Care shall be taken that regrinding of the cutting edge will not cause weakening of the body and the connection of the cutting edge to the body.

SPECIAL CUTTERS

Router cutters can be made to customer's specific requirements. Please provide exact dimensions or a wood profile, shank size, material grade (e.g. TCT or PCD), flute form, number of tips, rotation and material to be cut to enable us to provide a quotation. Please contact Trend Technical Support for further information

RE-SHARPENING

Cutting tools can be honed on a diamond stone or sent away for professional re-sharpening. Router cutters and sawblades can be honed on Diamond Whetstones. Please see pages 192-193 of catalogue.

Trend or certain Trend agents can offer a re-sharpening service. For further information on Trend's re-sharpening service please contact Trend Technical Support.

DC400 DOVETAIL CENTRE

Multi-functional dovetail jig for variable pitch lapped or through dovetails. For use with medium to heavy duty routers.

Our DC400 dovetail centre is the breakthrough you have been waiting for. It is the world's first variable layout dovetail jig that is completely free of adjustment. You can change from through dovetails to lapped dovetails, adjust the pin and tail guide finger positions, change work-piece thickness all without adjustment.

Now you can have the professional look of hand cut dovetails without the hassles of a complicated jig.

DC400 £275.00

mmmmmm)

Video manual available

See page 195 for full details.

TV/9

Specification:

Rating	Craftsman/Professional	
Dovetail size		Variable
Workpiece width max.		400mm
Workpiece thickness -	through	19mm
Workpiece thickness -	lapped	25mm
Guide bush size		11.1mm

Full Router Support Two quide rails provide full support

for your router base, so you do not have to balance your router on the edge of a row of guide fingers as per conventional jigs.

> Router and fine height adjuster not included.

DC400 trend

Accuracy and Repeatability

Carbon fibre finger guides click directly into the rear guide rail, engaging in an index strip at increments of 2.5mm. This guarantees true repeatability and means you can restore or reposition guide fingers with absolute accuracy.

Click-in Guide Fingers

There are three types of pin guide; angled pin guides for cutting through dovetail pins are available in five different angles from 7 up to 20 degrees. Common fork-shaped tail guides for cutting through and lapped tails; and the straight sided pin guides for cutting lapped pins.

Visibility and Dust Extraction

Fully enclosed body with a removable window ensures routed waste is directed away from the operator and provides good visibility. The optional snap-in waste collection kit will also remove almost 100% of the waste.

Clamping channels with two independent parallel clamping bars require only a single hand to operate, enabling the free hand to position the work-piece. The clamping bars and integral side fences are positioned close to the machining area, to ensure total security.

DC400 DOVETAIL CENTRE CONTINUED

Unique Click-in Guide Fingers:

Through Dovetails

Use Angled Pin Guides to cut 'Pin' pieces with the straight cutter. The choice of Pin Guide Angle is

dictated by the thickness of the pin piece.

CDJ300 & 600 DOVETAIL JIGS

Two accurate and easy to use Dovetail Jigs for a variety of elegant joints.

- Two sizes 300mm (12") and 600mm (24").
- Cuts 1/2" wide half blind dovetails or rebated dovetails in one operation.
- Precision made laser cut zinc plated steel template with packing piece.
- Adjustable offset stops for 600mm jig.
- A Unibase and fine height adjuster may be required for certain makes of router.
- A range of accessory templates are available for box joint, dowel and through dovetails for both jigs.*

Enables mortise & tenons and dowel joints to be cut with a router. Ideal for cabinet, chair and table construction.

- CNC precision manufactured plates and body.
- One set-up for both mortise and tenon giving perfectly fitting joints.
- Fully adjustable for compound angle joints up to 45°.
- Reversible templates to produce round and square end tenons.
- Templates can be used for accurate dowelling applications.
- Cuts mortise & tenon sizes of 1/4" (6.3mm) to 5/8" (15.9mm).
- Guide bushes are included but cutters are required.
- A Unibase may be required for certain makes & models of router.
- All tenons are cut with a 5/8" diameter straight cutter (Ref. C026). The width of the tenon is adjusted by using different guide bush diameters.

MT/DUSTKIT_ £22.00

Special TC Router Cutter Unique designed cutter with built in

Setting-up

The diameter of the finished access hole will be 250mm. Carefully mark the centre point of the circle, if possible positioning the access hatch between the floor joists. Screw the Routabout jig to the floor using a single No. 8 particle board screw at the centre point to act as a pivot.

Routing Procedure

With the guide bush and cutter fitted to the router, place onto the template. The depth is automatically set by a top guide bearing attached to the cutter body. Rotate the router around the centre screw in a clockwise direction, cutting to the full depth in a series of shallow steps until the cutter breaks through.

Completed Cut

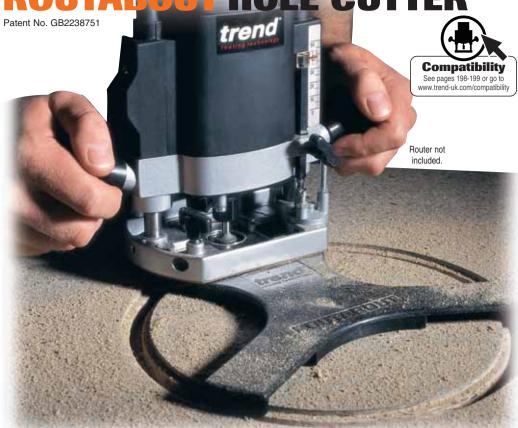

When cut, the waste piece is supported by the wings of the jig. The stepped cutter automatically cuts a rebated edge on the waste piece as well as around the edge of the hole.

End Result

Fit the plastic insert ring into the access hole and turn the waste piece over. Drop it into the ring and it will lay

Access to pipes & cables beneath chipboard floors in seconds. For builders, plumbers & electricians.

- A 250mm diameter opening can be cut and made good in seconds.
- Designed for use in new or existing 18mm and 22mm chipboard or similar floors.
- Cuts only the thickness of the board.
- No waste, the piece cut out is used to make good the
- All you need is a plunge router (750 watts or above). Cutters are offered with 1/4" or 1/2" shank sizes. An 8mm shank cutter is available as an accessory.
- A Unibase may be required for certain makes and models of router.

Special TC Router Cutter

Unique designed cutter with built in depth guiding bearing fitting to shank.

Setting-up

The diameter of the finished access hole will be 108mm. Carefully mark the centre point of the circle, if possible positioning the access hatch between the floor joists. Screw the Routabout jig to the floor using a single No. 8 particle board screw at the centre point to act as a pivot.

Routing Procedure

With the guide bush and cutter fitted to the router, place onto the template. The depth is automatically set by a top guide bearing attached to the cutter body. Rotate the router around the centre screw in a clockwise direction cutting to the full depth in a series of shallow steps until the cutter breaks through.

Completed Cut

When cut, the waste piece is supported by the wings of the iig. The stepped cutter automatically cuts a rebate around the edge of the hole.

End Result

Fit the plastic cover into the access hole. It will lay flush with the floor surface.

Smaller version of the successful Routabout for access to pipes & cables beneath chipboard floors in seconds. For builders, plumbers & electricians.

- A 108mm diameter opening can be cut and made good in seconds.
- Designed for use in new or existing 18mm and 22mm chipboard or similar floors.
- Cuts only the thickness of the board.
- A cover is used to fill in the cut-out.
- All you need is a plunge router (750 watts or above). Sets are offered with 1/4" or 1/2" shank diameters.
- A Unibase may be required for certain makes and models of router.
- Maximum weight on cover is 380kg.

STAIRCASE HOUSING

These template jigs are a well proven means of routing out stair housings quickly and accurately.

Constructed from hard wearing solid laminate and includes a reversible fence for exact matching of stair strings and fully adjustable nosing piece (STAIR/A).

Built-in heavy duty front clamp for quick clamping for each trench. Unique to Trend jigs.

Adjustable to suit private and common stair angle pitch

Standard TCT dovetail cutters are offered for various tread thicknesses for the closed riser staircase jig (STAIR/A). The open riser staircase jig (STAIR/B), incorporates a stub riser to conform with building regulations.

Sub-base is pre-drilled to suit Trend/Dewalt/Elu 1/2" routers, for other makes the sub-base will have to be re-drilled. Please state make and model when ordering.

All heavy duty routers over 1600 watts can be used.

ROUTER T-SQUARE

The Router T-Square can be used as a straight quide for routing housings, squaring & trimming boards and jig setting.

- 1000mm long blade.
- It is also ideal as a general workshop square for marking and setting out.
- Made from hard wearing solid phenolic resin.
- Has false cheek fitting facility.
- Squareness tolerance 0.5mm over 1 metre.

£47.50

KITCHEN WORKTOP JIGS

The best worktop jigs in the world, designed to enable all 1/2" shank plunge routers to cut precise butt & scribe joints in postform worktops.

Combi Jig Features:

- Machined from hard wearing solid laminate.
- Will produce a joint in 15 minutes including setting-up time.
- Out-of-square joints can be accommodated (COMBI 66 & 1002).
- Facilities to cut various widths of board and thicknesses up to
- Integral panel bolt connector recessing template with easy spanner access.
- Width setting stop for accurate positioning.
- Supplied with clear & comprehensive instructions for use.

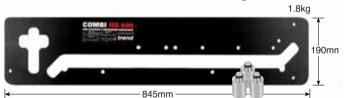

All Jigs Require:

- A portable plunge router with 12.7mm (1/2") shank capacity and minimum 1300 watts.
- A template guide bush with 30mm outside diameter.
- A TCT router cutter with 12.7mm (1/2") diameter and 50mm (2") cut lenath.
- Two 100mm (4") throat clamps.

OMBI 600 JIG

Lightweight jig for use on both bathroom & kitchen worktops.

- A single male and female template in 10mm solid laminate.
- Offset widths 225, 300, 325, 400, 500, 600 & 616mm.
- Integral single bolt recess slot for connecting bolts.
- Three alloy location bushes.
- Correct slot edge indicator.

COMBI 66 JIG

Jia from 500mm to 650mm wide worktops, with Peninsular cut. 3.3kg

- A single male and female template in 16mm solid laminate.
- Facility to join boards from 500mm to 650mm
- Two bolt recess slots for connecting bolts.
- Three alloy location bushes & width setting stop.

CONTRACTOR

HINGE JIG

Patent No. GB2285410 with adjustable apertures.

The Hinge Jig is a portable template set designed for recessing hinges in wooden doors & frames. It is easy to use with minimal setting-up time, completing the job both accurately & quickly.

HINGE/JIG (single piece) ____£224.00

H/JIG/A (two piece)

£234.00

Includes:

- **Apertures**
- Bradawls with Spacer
- 16mm Guide Rush
- **T-Handle Hex Key**
- 4mm Spacing Gauge

Fabric Storage Case (with H/JIG/A)

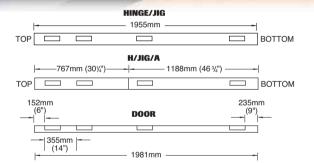

H/JIG/A

Router not

Two piece hinge jig for easy handling.

Supplied in fabric case

HINGE JIG

- Used on-site & in joinery shops to increase productivity with excellent results.
- Four apertures for fire door requirements.
- No need for marking out in the conventional way.
- Quick & simple to set-up as the hinge is used as the pattern.
- Clean & accurate recesses are achieved every time.
- Suitable for timber based doors & square butt hinges.
- Use with a light duty router with 1/4" collet.
- Long reach router cutter required, 12mm diameter with 70mm overall length.
- Angled position slots to prevent creep.

Specification:

Hinge sizes possible

Length min.	2-5/8" (67mm)
Length max.	5" (127mm)
Width min.	3/8" (9.5mm)
Width max	1-3/8" (35mm)

Door sizes possible	
Height min.	6' 5" (1955mm)
Height max.	6' 10" (2100mm)
Thickness min.	5⁄8" (16mm)

Optional Accessories:

Universal Sub-Base

Certain makes & models of router including the T4 will require a Unibase to accept the guide bushes.

Long Reach cutters

INTERNAL DOOR

Patent No. GB2285410 with preset apertures for 75mm hinges.

A light duty hinge jig for routing 75mm hinge recesses in internal doors and linings.

- Hard wearing template in 12mm laminate.
- Two part, splits into two lengths with dovetail joint.
- One set up for door and frame. No need to adjust for repeated doors.
- Three pre-set apertures 6" down, 9" up and middle.
- For internal doors 15mm to 51mm thick with separate (plant on) stops.
- Swivel end plate for 3mm gap to head of door.
- Pin park in jig body.
- Includes three 10mm diameter plastic pins with tapered shoulder for tight fit, two bradawls and 16mm guide bush. Unibase may be needed.

LOCK JIG

This jig uses a set of interchangeable templates & with a router will cut the mortise & face-plate recess for popular door locks.

- Fast, clean & accurate results on doors 34mm to 58mm thick, even in hardwood.
- CNC precision manufactured plates & body.
- The jig requires a plunge router with a 80mm plunge, fitted with a 30mm guide bush & 12mm diameter long reach cutter.

Includes:

- **Guide Bush Collar**
- 12 x Face Plate Templates

LOCK/JIG

£85.00

the 16mm guide bush to 30mm.

Final Application

Mark the appropriate position for the lock & centralise on the door using the centre line notches within the jig aperture. The jig can then be clamped to the door. In most applications, the door will be held secured on its side

HOW IT WORKS:

Both the mortise & the face-plate are selected to

suit the size of the lock. Templates are held by

Must be used with a 30mm guide bush & 12mm diameter cutter. For deep mortises a heavy duty

router should be used with the long reach cutter.

Hinge & Lock Operations

If a medium duty router is to be used, then full mortises are not possible & a suitable sized

auger bit in a drill will be required. If the Lock jig

is to be used in conjunction with the Trend Hinge Jig, then the collar should be used to bush out

Templates

two powerful magnets. **Compatibility**

Includes templates for locks having following

dimensions: **Face-plate Dimensions:**

Imperial	Metric	Template
7/8" x 6"	22.2 x 156mm	1
7/8" x 6"	22.5 x 152.5mm	2
1" x 4-3/4"	25.4 x 121mm	3
1" x 5"	25.4 x 128mm	4
1" x 5-1/4"	25.4 x 133.5mm	5
1" x 5-3/4"	25.4 x 145mm	6
1" x 6"	25.4 x 153mm	7
1" x 6"	25.4 x 156.5mm	8
1" x 6-1/2"	25.4 x 165.5mm	9
1" x 7"	25.4 x 177mm	10
1" x 2-1/4"	25 x 57.5mm	11 UPPER
1" x 2-1/4"	26 x 56.5mm	11 LOWER

Mortise Dimensions:

Imperial	Metric	Template
5/8" x 2-3/4"	16 x 72mm	Α
5/8" x 4-1/4"	16 x 107mm	В
3/4" x 3"	19 x 78mm	С
3/4" x 4-1/4"	19 x 109mm	D

These are maximum mortise lengths, unless radius ends are squared with a chisel. However smaller mortise locks can be accommodated depending on position of their fixing screws.

- Spirit level or Clamp Guide straps.

ROUTER CARVER

The Trend Router Carver system is a revolutionary routing concept that creates variable depth wood carvings with a plunge router.

- Carvings can be made on new or existing doors, frames and drawer fronts.
- The system comprises a unique engraving cutter housed in a conical bearing guide, used together with a set of templates and template frame.
- The templates have accurately shaped slots with varying widths which guide the cutter both horizontally and vertically to give authentic carvings.

Clamp template frame to component

Position template and follow the slots using the special cutter

Reposition template and rout again.

Finished carving

The Cutters

The cutter consists of a 45° engraving 'V' groove TCT cutter, housed in an aluminium cone shaped bearing guide. The cutter depth is fully adjustable to

vary carving effect and allows for any variance after resharpening. The 8mm shank cutter must be used in a professional router with a base aperture of minimum 40mm. The 1/2" shank router cutter must be used with at least a 45mm. diameter aperture. Always make trial cuts on a waste piece of material first

HOW TO ORDER

A typical order for the Royal door rail design:

- 1 x Router Carver Cutter
- 1 x Template Set
- 1 x Frame to suit template

Further door rail templates can then be purchased and used with the frame.

Remember to include in your order the appropriate frames to fit your chosen Router Carver templates.

Kitchen Door Designs

Three styles of templates for kitchen doors. The Royal & Roma designs can also be enhanced by the addition of one of the two large sized rosette designs.

Accessory:

N/COMPASS/AEX _£17.50

Threaded rods that extend the studded rods allowing an increase of 560mm (two pairs).

ELLIPSE & CIRCLE CUTTING JIG

Designed to enable virtually any router to cut ellipses and circles.

- Used for corner tables, arches, desks and mirrors.
- Setting-up and operating is simple and effective, as proven by existing industrial users.
- A connector plate on the end of the bar fits directly onto the fence rods of Trend routers. For the fixing of other makes of routers, an accessory Adapter Base-Plate is required.
- By using one slide, the jig can be adapted for cutting circles.
- With additional extension bars, larger ellipses and circles can be cut.

Includes:

- 1 x Cross Frame
- 2 x Sliders
- 2 x 500mm Bars
- 1 x Connector Plate

Optional Accessories:

Extra Extension Bar

500mm long for extra large ellipses & circles

MINI ELLIPSE & **CIRCLE CUTTING** JIG

The Mini Ellipse Jig is ideal for routing elliptical picture frames, mirrors, clocks and small coffee tables.

- Working on the same principle as the Ellipse Jig, the Mini Ellipse Jig, produced from plastic will cut much smaller ellipses.
- The main plate will accept most makes of small router for which screws are provided.
- By removing one slide and using a special pin, the jig can be used to accurately cut circles.
- For marking out prior to cutting, the plate can be fitted with a pencil plug. The jig is then turned into a drawing instrument.

ME/JIG

£89.00

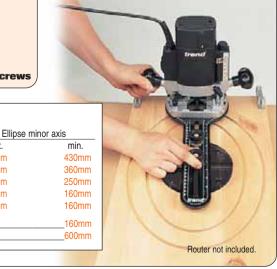

Includes:

- 1 x Cross Frame
- **Main plate**
- 2 x Sliders
- 1 x Circle Slider
- 1 x Pencil Plug
- **Set of Securing Screws**

220mm	160mm	160mm					
Circle dia. min		160mm					
Circle dia. max		600mm					

OFFSET BASE

This teardrop shaped base is fitted to the router and allows better control when edge moulding, by preventing router tilt.

- Large knob for greater control.
- Pre-drilled for Trend. Elu and DeWalt routers.
- Can be re-drilled by user to suit other makes of router.
- Made from clear plastic.

OFS/BASE

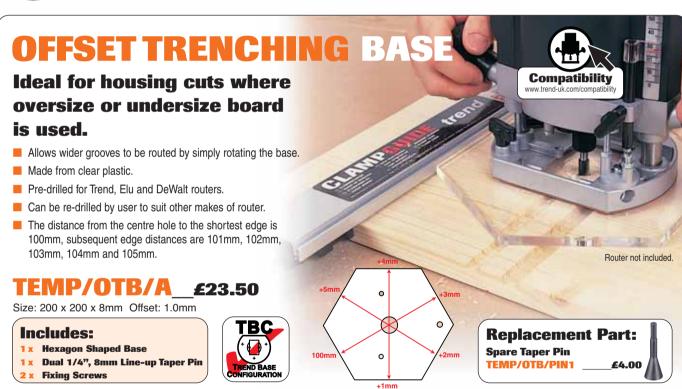

£23.50

Size: 280 x 180 x 8mm

Includes:

- 1 x Teardrop Shaped Base
- **Knob Assembly**
- **Fixing Screws**

BEAM TRAMMELS

For circle cutting with a router

BEAM TRAMMEL BARS

Can be used with the majority of routers on the market. The bar fits into one of the holes for the router side fence. They have a pivot point which is adjustable in height.

£20.50

RFAM/001 8mm rod dia. x 500mm.

BEAM/002 10mm rod dia. x 500mm.

The point attaches to one of the routers fixed rods. The pivot point on BEAM/005 is adjustable in height and this trammel can be used on most 8mm rods. The BEAM/009 point is fixed and can only be used on the Trend T9, Metabo OF1612 and OFE1812, Felisatti TP246(E) and R346EC Routers.

BEAM/005	£6.00
For 8mm dia. fence rods.	
BEAM/009+	£ 8.50

For 10mm dia. fence rods.

VARIJIG FRAME SYSTEM

Adjustable frame and quide for use with a router.

- Adjustable frame for rectangles and squares.
- Allows a router to cut recesses, slots, face panel moulds etc.
- Four lengths of 700mm extrusion with dual metric/imperial measuring scales.
- Working area 600mm x 600mm.
- Includes router anti-tilt block.
- Cross cut accuracy to 0.1mm, a square is required to square frame
- Use with a guide bush with minimum 8mm spigot length, or use Unibase as guide.
- Secure with standard clamps or use optional clamp kit. See below.
- Can also be used to create panel doors for kitchens etc.

- 4 x Alloy Extrusions with Scales
- 4 x Corner Brackets
- **Anti-tilt Shoe**
- 1 x Anti-tilt Shoe Fixing Screw

Frame Jointing Kit

Router not included.

Optional Accessories:

Clamp Kits

Pair of sliding friction clamps with 32mm clamping thickness.

VIS/CK/I £29.50 Pair of sliding friction clamps with 51mm clamping thickness.

Recommended 30mm Guide Bush

GB30/A

With extra long 10mm spigot.

Unibase

UNIRASE

£14.50 Certain makes & models of router will require

a Unibase to accept the guide bushes

Rectangles

Anti-tilt Shoe

VARIJIG 2540MM STRAIGHT GUIDE

For guiding routers, circular saws and jigsaws.

- Two lengths of extrusion with jointing piece to give maximum working length of 100" (2540mm). Reduced length for easier transport and storage.
- Clamps can slide along each extrusion.
- Maximum material clamping thickness 32mm.
- Adjustable friction washer on clamps prevent clamp from sliding too freely.
- One extrusion has dual metric/imperial scale.
- Can be combined with Varijig parts.

Includes:

1 x 56" Alloy Extrusion with Scale

1 x 56" Allov Extrusion

- 1 x Connecting Block 1 x Hex Key 4mm 2 x Sliding Clamps

Replacement Parts:

Clamp Kit

£19.50 Pair of sliding friction clamps.

Connecting Block Kit

£10.00 Jointing block for extrusions

Saw not included.

Accessory:

Long Clamp Kit

Pair of sliding friction clamps with 51.0mm (2") clamping thickness

VJS/CK/L (pair)

VJS/G/35 £43.00

Includes:

1 x Alloy Extrusion with Seal

Quick action (two required)

Trenching/Grooving

Crosscutting

Trimming

ROUTER TEMPLATES

A range of clear plastic router templates, for use with any plunge router.

NUMBER TEMPLATES

Comprising two templates covering numbers 1-10

TEMP/NUC/57

£17.00

Size: 360 x 110 x 5mm

LETTER TEMPLATES

Comprising of four templates covering the alphabet A-Z.

TEMP/LUC/57 £34.00

Size: 396 x 110 x 5mm

AP-CDEF.

£3.50

123450

7900)10

Clear plastic letter and number templates for writing words for signs including house names and numbers. The templates are used with a 13mm guide bush and 8mm diameter cutter. The letters are uppercase block characters in Trend Vogue typeface. All letters and numbers are nominal 57mm high. A Unibase may be required for certain makes and models of router.

Optional Accessories:

Cutter & Guide Bush

Comprising Craft Range cutter Ref. C011X1/4TC & plastic 13mm guide bush.

TEMP/LN57X1/4 _____£12.00

Spare Guide Bush

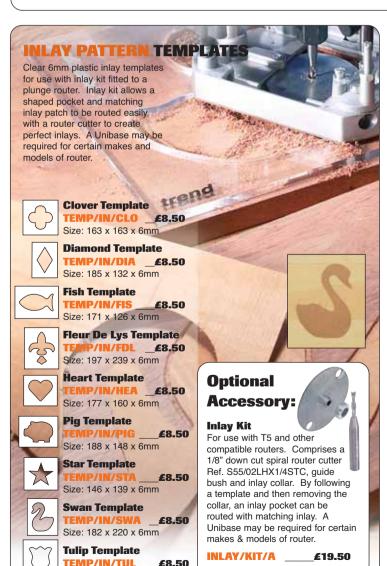

Diameter 13mm x 5mm spigot

GB13/P/A

Router Cutter

C011X1/4TC Diameter 8mm

/4TC _____£8.50

Size: 137 x 135 x 6mm

Measurements shown are: Template Width x Height x Thickness.

A template to rout holes of various diameters and to put a concave or convex shape on the component. A template profiler cutter can be used to create holes of 25mm, 50mm, 75mm and 100mm in diameter. The template edge also includes concave and convex 50mm and 100mm radius profiles. A variety of other size holes and curves can be achieved by using a different combination of cutter and guide bush. A Unibase may be required for certain makes and models of router.

TEMP/COR/A Size: 290 x 290 x 8mm_

CABLE TIDY INSERT TEMPLATE

A template that enables 60mm and 80mm round and 105mm x 55mm rectangular holes, to be routed in desks or any surface where cables need to be hidden. The holes will then accept a plastic cable tidy. The template can also be used to cut a 35mm blind hole for circular kitchen door hinges. A 30mm diameter guide bush and a 12mm diameter cutter are required. A Unibase may be required for certain makes and models of router.

computer, telephone & audio cables, through desktops, cabinets & shelving units. The 60mm & 80mm inserts have a spring loaded swivel cover plate. Cover plates can be removed to allow plugs to pass through. The rectangle insert has four cable apertures & a ribbon slot.

CTI/60/PK1 (3 off) £6.50 (60mm dia. - light grey

CTI/80/PK3 (3 off) 80mm dia. Black

CTI/60/PK2 (3 off) £6.50

CTI/105/PK1 (3 off) 105 x 55mm - grey

60mm dia. - brown

60mm dia. - black

CTI/105/PK2 (3 off) £7.50 105 x 55mm - brown

CTI/80/PK1 (3 off) £9.00 80mm dia. - light grey

CTI/105/PK3 (3 off) **£7.50** 105 x 55mm - black

CTI/80/PK2 (3 off) £9.00 80mm dia insert - brown

Sizes stated are routed hole size in board.

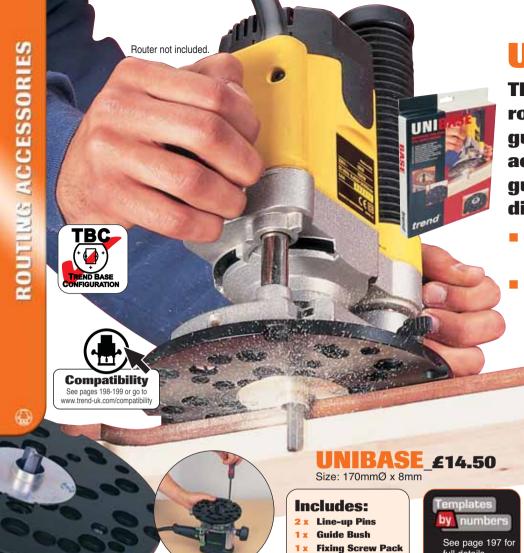

FRAME & PLAQUE TEMPLATE SET

A seven piece template set that allows elliptical picture frames and plagues/plinths to be routed. Made from clear 8mm thick laser cut plastic. The four picture frame templates and three plaque templates are supplied with pinholes so that they can be secured to the component, or alternatively they can be secured with hot melt glue or double sided sticky tape. Use with a bearing guided 12.7mm diameter template profiler or laminate trimming router cutter, in a router table or portable use. Back of frame requires 12.7mm guided rebate cutter.

UNIBASE

The Unibase enables routers with non-standard guide bush fittings to accept the range of Trend guide bushes. Will fit directly to most routers.

- Line-up pin used with a 16mm plastic bush to ensure concentricity of the cutter to the guide bush when fitting the sub-base.
- Suits collet sizes 1/4", 8mm, 12mm and 1/2".

Replacement Parts:

Fixing Screws Pack
FIX/KIT/3 _____£2.00
Fixing screws for all makes of router.

Guide Bush

£3.50

16mm diameter plastic line-up guide bush.

Line-up Pins

UNI/PIN/1 _____£1.7

To suit 1/4" and 1/2" collet.

UNI/PIN/2 _____£1.7

Guide Bush Mounting Screws

GB/01 £2.25

10 off 2BAx1/4"

Cutter Template/Guide Bush Relationship:

This chart shows the offset which results from using a specific size of guide bush and cutter. This offset shown on the shaded areas should be calculated prior to producing a template. All the guide bushes will fit the UNIBASE, GB/5 and GB/PLATE sub-bases-see opposite. As a rule allow 1.5mm to 2mm clearance between cutter and inside wall of guide bush.

Instructions For Fitting:

The line-up pin fits into the collet and is plunged through the router base. The line-up bush is fitted into the UNIBASE and secured. This is then placed over the line-up pin and rotated in order to line up the fixing holes. The UNIBASE screws are tightened and then the line-up bush can be replaced with any choice of Trend guide bushes. These range from 10mm up to 32mm (GB10 - GB32). For larger diameter cutters a 40mm guide bush (GB40) is available. See opposite page.

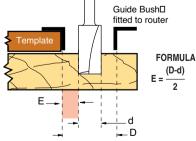

Guide Bushes When Hand Routing:

Guide bushes are required when material has to be profiled or routed to a set pattern or shape.

In operation, a suitable guide bush is first mounted on the router base or sub-base. When choosing guide bush and cutter, make allowances for a minimum of 3.5mm between cutter and outside of bush. This ensures there is enough clearance to allow the waste to clear the guide bush.

There is a special size relationship between the bush, the cutter and the template. The diagram shows this relationship, which is important for cutting the template to correct size. The difference in size of template relative to the finished workpiece can

be calculated as follows:

'Deduct the cutter diameter from outside diameter of guide bush and divide by two'.

This difference is shown in the chart by the shaded area relative to the range of bushes and cutters available.

GUIDE BUSHE

SUB-BASES

Router not included

EURO STYLE PLASTIC

GUIDE BUSHES

- Made from durable plastic.
- Outside diameters from 10mm to 33mm.
- Fits directly to Trend T3, T4, T5, T5 MK2, T9, T10 & T11 and other routers with Trend guide bush fittings. Please see Compatibility Chart on pages 198-199.
- Will fit other makes when used with GB/5, GB/PLATE or UNIBASE.

GB/SET/1

£23.50

Plastic Guide Bush set of 12. Even sizes 10mm to 32mm in 2mm increments.

£23.50

Plastic Guide Bush set of 12. Odd sizes 11mm to 33mm in 2mm increments

£23.50

Plastic Guide Bush set of 14. Imperial sizes 3/8" to 1-5/16" in 1/16" increments

GUIDE BUSH COLLARS

FOR INLAY WORK

Five sizes of aluminium collars to fit guide bushes. Enables single shaped templates to be used to cut perfectly matching pocket & inlay. Collars have integral rubber 'O' rings to ensure collar secures onto quide bush. Templates should be made with suitable sized corners for the collar being used. The correct diameter straight cutter as indicated should always be used. (Guide bush not included.)

GB/COLL/7914

Fits to GB793 to give 14.3mm (9/16") OD. Use with 3.2mm (1/8") Ø cutter.

GB/COLL/1630

£5.00

Fits to GB16 to give 30mm OD.

Use with 7mmØ cutter.

GB/COLL/2040 Fits to GB20 to give 40mm OD. £5.00

Use with 10mmØ cutter.

GB/COLL/25454 £5.00

Fits to GB254 to give 54mm OD.

Use with 14.3mm (9/16") Ø cutter. GB/COLL/3054

Fits to GB30 to give 54mm OD. Use with 12mmØ cutter.

EURO STYLE PRECISION STEEL GUIDE BUSHES

- Guide bushes to guide the router when using a template.
- Fits directly to Trend T3, T4, T5, T5 MK2. T10 & T11 and some other light duty routers. Please see compatibility chart on pages 198-199.
- Will fit other makes of router when used with GB/5, GB/PLATE or UNIBASE.

ROUTER TABLE ACCESSORIES

ROUTER TABLE INSERT

A large rigid router table insert plate for incorporation into user-made router tables.

- Thermoset phenolic plastic router plate.
- Two concentric snap-in rings.
- Three hole sizes of 98mm, 68mm & 32mm dia.
- Concentric rings and radial lines on underside for easy centring of router.
- Moulded with slight crown (0.8mm) for distortion free cuts.
- Corner clips to clamp to table underside.
- Can be mounted to 19mm tops with edge rebate of 6.35mm deep x 12.7mm wide.
- Will accept screw-on style guide bushes for use as a copy follower.

Includes:

- 2 x Concentric Rings
- 1 v Lead-on Pin

RTI/PLATE

PUSHBLOCK NEW

For scribing rails on a router table.

- Plastic 8mm thick base board to ensure flatness.
- Safely holds rails for scribing cut for panel door routing.
- Sliding front stop with grip abrasive.
- Adjustable height toggle clamp.
- Spelch block fitting to prevent breakout.
- Max. component width 100mm, min. thickness 15mm, max. thickness 30mm.
- Facility to exchange handles to allow use with an overhead router for end cuts.

Spelching Block **Facility**

PUSHBLOCK/4

Not suitable for use with PSC/105 and PSC/107 router cutters.

NO-VOLT RELEASE SWITCH

Trips power to the machine should the power be momentarily cut off. The switch must be bolted directly to router table leg or a user made workboard. Protected green switch to prevent accidental start up. 2.5m plug cable and 0.5m socket cable.

NVRS/230V (13A 230v Plug. Max. 2000w at 13.5A) £45.00 NVRS/115V (16A 115v Plug. Max. 1850w at 13.5A) **£**69.50

TRIGGER LOCK

To lock trigger in 'on' position, when used in table mode with a No-Volt Release Switch fitted.

ROUTER & CUTTER STORAGE

14" ROUTER ITILITY BAG

Purpose designed tool bag for router and tools.

- Accepts router power tool and accessories.
- Tough hardwearing polyester.
- Padded inner base, reinforced grip handle and shoulder strap.
- Exterior end pockets with Velcro® closing for router accessories.

Cutter pockets

Padded interior

Size: 360mm (14") x 375mm (15") x 305mm (12")

Pocket for side-fence

Side pockets for tools

Router, tools and

accessories not included.

Movable partitions

UTTER RACKS

Removable pouch with belt loop

Adjustable position cutter storage rack for twelve router cutters. Two sizes available for either 1/4" or 1/2" shank tools. Made from durable highimpact plastic. Stores cutters safely and securely by simply twisting the lever. There are two hanging holes for wall mounting or they can be screwed to a shelf or inside a drawer.

CS/RACK/635

Size: 381 x 30 x 20mm

CS/RACK/127

Size: 381 x 30 x 20mm

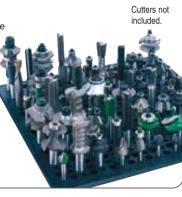

CUTTER TRAY

A 400 hole storage tray for the safe transport and storage of router cutters. Made from hard wearing nylon plastic, this storage tray holds cutters safely and securely when not in use. There are one hundred of each of the four sizes of holes; 1/4", 8mm, 3/8" and 1/2". All hole sizes are fractionally oversize to allow the easy removal of the cutter.

CS/TRAY/A

Size: 302 x 302 x 16mm

STORAGE CASES

For cutters & accessories

Storage cases have foam base with cut-outs (except Ref. CASE/5) to store the cutters. The lid is lined with softer foam to ensure the cutters stay in position. Large cases have a box for spare parts and a water bottle included. Ref. CASE/5 has a foam base with no cut-outs

Small Case Size: 330 x 95 x 45mm

£19.00

For Craft Range with twelve 1/4" shank cutters.

Large Cases Size: 350 x 250 x 50mm

£29.00 For Professional Range cutters with twelve 1/4" and eight 1/2" shanks, slotter sets, collets and 4"

diamond stone.

CASE/5

£28.50

For Professional Range with no cut-outs in foam

STORAGE CASES

For Trend Routers

Four sizes of blow moulded storage cases for safely transporting and storing Trend T4, T5, T5 MK2, T9, T10 & T11 routers. Ideal for storage of a router on-site or in the workshop.

Trend T4 Router Case

CASE/T4

Size: 415 x 290 x 140mm £11.25

Trend T5/T5 MK2 Router Case CASE/TS

Size: 470 x 357 x 165mm £34.00

Trend T10 & T11 Router Case CASE/T10

Size: 390 x 295 x 240mm £33.50

Measurements shown are: Length x Width x Depth

DEPTH GAUGE

Patent No. GB2386085

Metal rule depth gauge to help set the height of router cutters and sawblades with greater accuracy.

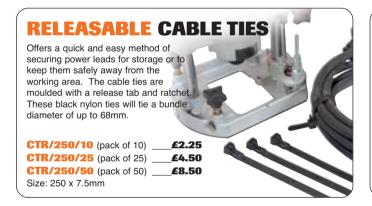

- Horizontal & vertical measuring.
- For hand routers, router tables and saw benches.
- 60mm wide aperture & accurate to 0.5mm.
- 80mm measurement range.
- U section plastic injection moulding with unique cam lever lock.
- Steel rule dual metric & imperial scale.
- Self standing for setting cutter depth on routers tables and low profile for backfence adjustment.

GAUGE/1 £7.00

ORGANISERS

Size: 15 x 3mm

JOINTING ACCESSORIES

WOODEN BISCUITS

Biscuit jointing has proven to be one of the strongest, fastest, safest and most accurate ways to join hard and soft woods, plywood, composition board etc. Compared to doweling, biscuit jointing is faster and more precise. The biscuits are made of die cut beech. Beechwood biscuits expand when in contact with a woodworking adhesive e.g. PVA glue.

MEASURING & MARKING

MULTI PROFILE SYSTEM TOOLING

These cutter blocks are ideal for the larger workshop. The range includes cutter heads made from steel or alloy. **Tool steel and tungsten carbide** tipped blades are available. Please see further details in our Industrial Tooling Catalogue.

Phone 0800 487363 for your free Industrial Tooling Catalogue and details of your nearest stockist.

Our complete range of spindle tooling is shown in our Industrial Tooling Catalogue.

MULTI PROFILE SYSTEM CUTTER BLOCKS 40 X 4MM & 50 X 4MM

- Cutterhead bodies in hard wearing aluminium or steel complete with 4mm thick tool steel rebate knives and corresponding limitor plates.
- Suitable for jointing, rebating and profiling in softwood and hardwood.

DISPOSABLE INSERT

REBATING CUTTER BLOCKS

Cutterhead in steel, complete with disposable tungsten carbide knives and scorers for improved finish. Suitable for producing various thickness rebates in softwood, hardwood and man-made boards (with or without coating) on a Spindle Moulder.

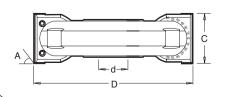

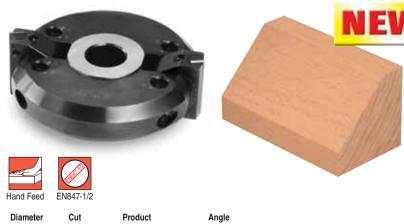

Diameter	Cut	Product	No. of		Depth of		
D	С	Ref.	blades	Bore	cut C	Max RPM	Price
100mm	50mm	IT/733 106 1	2+4	30mm	20mm	7,600 - 12,900	£94.50
125mm	50mm	IT/733 102 1	2+4	30mm	30 mm	6,100 - 10,000	£97.00
125mm	50mm	IT/733 102 7	3+4	1 1/4"	30 mm	6,100 - 10,000	£97.00

DISPOSABLE INSERT ADJUSTABLE CHAMFER CUTTER BLOCKS

Cutterhead body in steel complete with disposable tungsten carbide knives. Suitable for producing chamfer cuts at various angles in softwood, hardwood and man-made boards on a spindle moulder. Cutting angle can be adjusted in 7.5° steps by using notched scale. Fine adjustments of 1° is also possible.

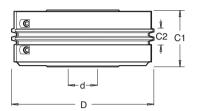

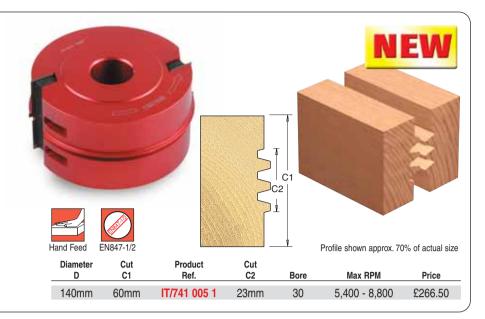

Diameter D	Cut C	Product Ref.	Angle A	Bore	Max RPM	Price
110mm	40mm	IT/734 014 1	-45° - +45°	30mm	7,000 - 9,000	£282.00
110mm	40mm	IT/734 014 7	-45° - +45°	1 1/4"	7,000 - 9,000	£282.00

DISPOSABLE INSERT

GLUE JOINT CUTTER BLOCKS

Cutterhead bodies in hard wearing steel complete with disposable tungsten carbide knives. Suitable for producing 'finger style' reversible glue joints in softwood, hardwood and man-made boards on a spindle moulder.

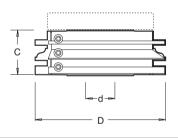

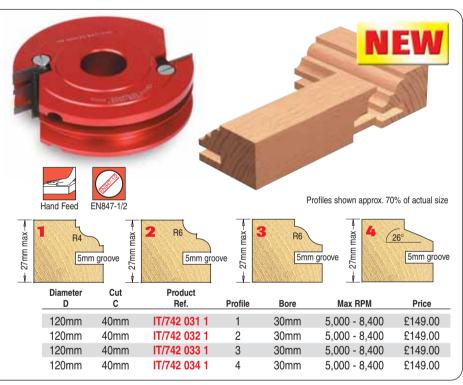

DISPOSABLE INSERT

PROFILE - COUNTER PROFILE CUTTER BLOCKS

Cutterhead in hard wearing aluminium, complete with disposable tungsten carbide knives. Suitable for producing various profile / counter profile joints in softwood, hardwood and manmade boards on a spindle moulder. Raising or lowering the cutter on the spindle moulder produces both parts of the joint. Same tool body accepts all four different profiles.

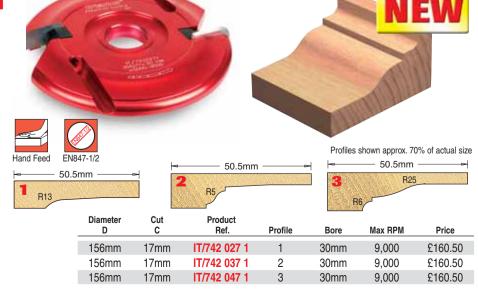

DISPOSABLE INSERT

PANEL RAISING CUTTERHEAD

Cutterhead in hard wearing aluminium, complete with disposable tungsten carbide knives. Suitable for producing various raised panel profiles in softwood, hardwood and man-made boards on a spindle moulder. Same tool body accepts all three different profiles.

The WAVEFORM range of sawblades are designed for demanding professional and industrial applications.

- These blades are laser cut from hardened, chrome alloyed steel plate which is then tempered and roller tensioned.
- The bores are accurately reamed to ensure precise balance.
- Micro-granular carbide tips are used to give long lasting performance in a wide range of materials and to provide the maximum number of re-
- Bore sizes are offered in standard 16, 20 and 30mm sizes, but can be reamed to suit specific requirements.

UNIVERSAL RIP BLADES

Coarse Finish

For ripping applications on saw benches for cutting along the grain. Chip limiter design for anti-kick back and cooling slots for continuous use.

bushing washers/rings must not be used.

Reamed bore to ensure precise fit to spindle.

A complete range of Tungsten

catering for cordless trim saws

to bench sa<u>ws.</u>

Wood cutting blades have front bevel tooth form for a superior quality of cut.

Silverbraze to ensure tip is bonded securely to body.

Microgranular Tungsten Carbide Tipped to allow cutting of abrasive materials.

Specific sawblades with anti-kickback tooth design.

Body hardened and tempered to maintain trueness.

Laser etched on reverse to European standard EN847-1/2. The Trend name for traceability and a guarantee of quality.

Blades 250mmØ and above are roller tensioned to prevent distortion when blade is under stress when rotating and cutting.

High grade alloy steel plate body precision ground to maintain flatness.

WOOD & WOOD BASED MATERIALS

Less teeth

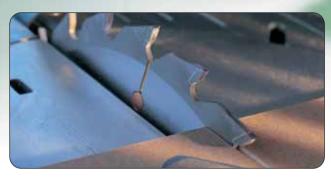

- Preferred for ripping along the grain of hard and soft wood and other wood based material.
- Coarser finish.
- Faster feed rate.

More teeth

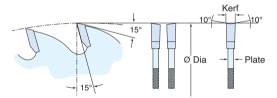

- Preferred for cutting across grain of hard and soft wood.
- Slower feed rate.

Suitable for:

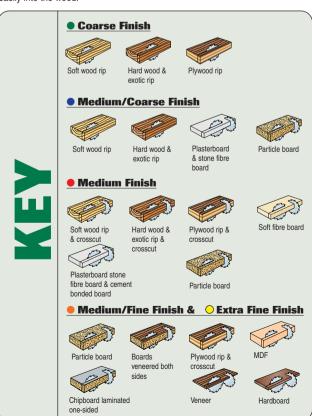

- Softwood
- MDF
- Hardwood
- Hardboard
- Particle board
- Plywood

Alternate top bevel tooth form

Teeth have top and front bevel which allows the blade to cut more easily into the wood.

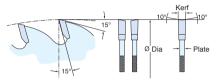

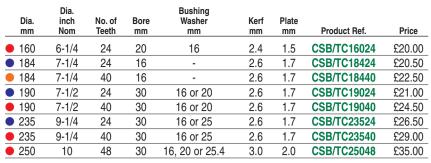

NON-STICK COATED BLADES

Non-stick PTFE coat to prevent resin build up and increase sawblade life.

Alternate top bevel tooth form

Soft wood rip

Hard wood & exotic rip

Particle board

CORDLESS TRIM **SAWBLADES**

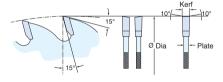

Thin kerf anti-kickback sawblades for cordless trim saws.

Not for use with Bosch GSK 24

Information taken from manufacturers catalogue and deemed correct at time of printing.

If in doubt about size and bore, please refer to your saw machine manual for the exact specification. (CC) = Radial arm or mitre saw (zero or negative hook angle).

- * = Will require a suitable bushing washer made to machine manufacturers specification.
- (T) = Thin body blade required for cordless trim saws.

All dimensions in mm unless otherwise stated.

Solid Carbide

PLANER BLADES

Trend Solid Carbide Planer Blades fit most makes of portable electric planers & are supplied

TUNGSTEN

Precision ground.

in pairs.

- Two cutting edges and reversible for extended life.
- Conversion kit required for some planers.

Blade length 82.0mm Blade width 5.0mm **Blade thickness 1.2mm**

CONVERSION KIT

For Makita, Ryobi, Hitachi & Kango planers. Contains a pair of plates to allow the PB/29 blades to be fitted into the planer cutter block.

PB/CK/119 _£10.00

beadLOCK"

Loose Tenon Joinery System

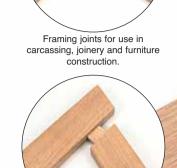

Patent No. US5.807.033 & US6.116.826

Make mortise & tenon joints with your drill.

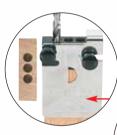

The beadLOCK® joint is made by first using the jig to drill multiple overlapping holes to create a mortise into each of the two parts to be joined. Then, a corresponding length of beadLOCK® tenon dowel is cut and glued into the mortises. beadLOCK® is safe, simple, strong and requires only a drill and 3/8" or 1/2" drill bit.

- Innovative shape of tenon stock provides maximum side grain gluing surface.
- Deep joints are limited only by your drill bit.
- Easily join large or long lengths.
- Handles material thickness 3/4" and up.
- Also ideal as a dowelling jig.
- Hardened steel drill blocks.
- Each kit is supplied with dowels. Additional tenon dowels are available.
- Router cutters are also available to make your own tenon dowels.
- Requires standard 3/8" or 1/2" drill bits (available separately).

simply by cutting the shoulder of one component to the relevant

Clamp jig to timber with an 'F' clamp or in a vice with the block in position 'A'. Drill holes to desired depth.

3. Cut length of tenon dowel 1/8" shorter than the total mortise depth and glue the workpieces together.

2. Slide guide block to position 'B' & drill remaining overlapping holes. Repeat on the other component.

By using two or more loose tenons in line, wide components can be jointed, e.g. the middle rail of an internal door.

Differing thickness of timbers can be jointed along the centres by use of the shim pack included.

BL/JIG/95

£30.00

Suitable for 3/8" loose tenons.

BL/JIG/KIT

£42.50

Suitable for 3/8" & 1/2" loose tenons.

A 9.5mm diameter stepped high speed steel drill. Supplied with depth setting collar.

PH/DRILL/95Q

POCKET HOLE PLUG CUTTER Tool steel plug/pellet cutter. Use in a pillar drill to allow plugs to be made to cover the pocket hole pockets. Allows plugs up to 52mm long to be created in end grain. PH/PC/95 £17.00

Adjust column position.

Drill pocket hole sockets.

Clamp timber.

Drive self tapping screws to secure.

BORING TOOLS

Our range of drilling tools include: twist drills, dowel drills, countersinks, counterbores, plug makers, machine bits and forstner bits.

■ Grades and sizes are geared to satisfy the demanding needs of the building industry, the joinery trades and workshops.

High quality and performance are the prime considerations in the design of our tooling which is manufactured using the latest technology.

BORING TOOL GRADES

High Speed Steel Tooling
Produced entirely in HSS, ground with a very fine edge.
Suitable only for non-abrasive materials, but will give a superior finish in soft timbers. HSS is slightly less expensive than TCT, but can be more suitable for certain applications i.e. drilling or cutting non-abrasive timbers & plastics.

Tungsten Carbide Tipped Tooling
Tips are brazed onto a steel body. Designed for use with the most abrasive materials and will outlast HSS tooling by many times. Applications are used for cutting or drilling natural timbers, plywood, medium density fibre board, chipboard & abrasive

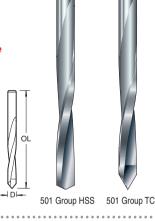

Carbon Steel Tooling

Less durable than HSS, WS is extensively used in the production of forstner & countersink tooling for use on natural timbers. Offers a cost effective solution for many applications.

Twist Drills

- HSS and TCT.
- Slow spiral is sometimes preferred for drilling end grain in wood.
- Ideal for fast drilling operations in open grained
- Tungsten Carbide versions have Solid Carbide ends, brazed in and ground to give maximum clearance.
- TCT drills have a 60° taper point and are recommended for hard or abrasive materials.

These drills are not for use with routers and not suitable for masonry work.

Dowel Drills

Lip and Spur - Long Series

- These have 2 lips, 2 spurs and a centre brad point.
- TCT versions have tapered spurs. The complete drill head is made from Solid Carbide.
- TCT drills are recommended for hard or abrasive
- Flutings are backed-off to give a radial relief and assist chip clearance.
- These groups of dowel drills are used mainly for drilling cross grained timber and particle board.

These drills are not for use with routers and not suitable for masonry work.

Universal Countersink

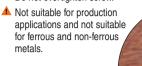

- This TCT countersink clamps onto any drill between 3.0mm and 7.2mm in diameter.
- Recommended for wood and man-made hoards
- By reversing the countersink on the drill, it can be used as a non-cutting depth stop.

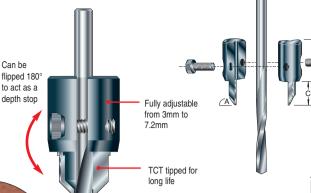

Ensure flutes of drill are aligned with flutes of countersink.

Hex key & screw

Countersink Sets

- They are designed to drill and countersink simultaneously, a wide variety of materials.
- Supplied complete with a HSS slow spiral drill bit.
- Fully adjustable, a hex key is supplied.
- The TCT version is used for plywood, particle boards and plastics (abrasive).
- Use at drilling speeds only.
- ▲ Not suitable for ferrous and nonferrous metals.
- ▲ Please ensure drill flutes are aligned with flutes of countersink. For replacement Twist Drills, use slow spiral type e.g. Refs. 501/18 to 501/716.
- Sizes No.4 and No. 6 have a shouldered body.

Machine Bits for Hinge Sinking

■ These machine bits are typically used by kitchen furniture manufacturers for recessing circular hinges.

Group 104

This type with scribers is used on veneered and wood finishes.

Group 421

This type without scribers are for laminate covered boards.

Group T420

This economy range is supplied without scribers and are used for recessing holes in melamine covered chipboard.

Group T421

Ref: T420 Group

chipboard.

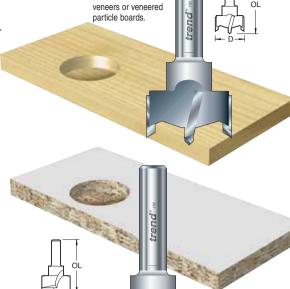

Use economy range

for melamine covered

This hinge sinker is best suited for thinner laminate covered boards.

Use sizes above 25.0mm at speed range 2,000 - 12,000 RPM to avoid burning.

Use with pillar drills only.

Ref: 421 Group Use for laminate covered boards.

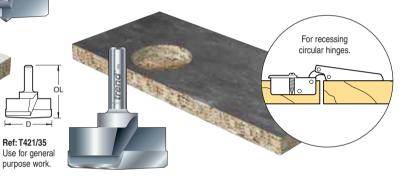

Ref. 104 Group Use for natural wood

Machine Bits Lip & Spur

- These machine bits have two wings, two scribers and a centre point.
- Tungsten carbide tipped for extensive drilling of particle boards, and plastics of soft to medium
- The scribes give a very clean entrance hole.
- A Not for use on hard dense materials, such as laminate covered board, phenolic Tufnol®, Wareite® and GRP. For such materials, choose from Group 421 tools which have no scribers.
- For use in drilling machines only.

Saw Tooth Forstner Bits

- Saw Tooth Forstner bits are made from high grade Carbon Steel and meticulously heat treated.
- They cut fast, with the grain or across it.
- They can drill overlapping holes in any direction and are chosen for exacting and delicate work, such as scroll and scalloping operations.
- Not for use with routers.

Plug Makers

- Precision made plug makers for use on natural timber, exactly matching the holes produced by the Saw Tooth Forstners groups 1306 & 1307.
- These have four to six wings to ensure a clean cut.
- Use a slow, constant feed rate ensuring timber is clamped to bed of drilling machine.
- 5-1/2" to 6-1/2" overall lengths.
- Do not use these tools on abrasive timber or hard plastics or metal.
- Not suitable for use with a router.
- ▲ Not for use with hand held power tools or routers.

TE DRILLING TOOL

- The body of the Trend Rosette drilling tool is made from tool steel which accurately supports a pair of removable Tungsten Carbide knives.
- This tool should be used in a standing drill press, mill, lathe or a CNC drilling machine. The wide choice of removable knives (not supplied) allow a variety of rosette patterns to be created in Medium Density Fibreboard (MDF).
- The shank is 1/2" in diameter with three flats for non-slip.
- Knives with outside spurs can be used to cut the rosette free to form a button.

nee to form a button.		-

World Patent App. WO2004002687

This versatile double-ended bit removes damaged screws, machine screws and broken bolts from wood, metal and plastic. It can remove screw sizes from Nos. 6 - 14 and broken bolts from size M4 - M8.

- Removes cleanly from wood, metal or plastic.
- Hardened tool steel.
- Removes screws made of any alloy including soft brass
- Removes free spinning screws.
- Winslow tip for self centring.
- Double-ended (burnisher & tapered thread).
- Hex shoulder to aid removal of jammed screw or bolt.

The 3D bit Unique Three Dimensional Drilling Tools.

European Patent No. 0 181 841

The effective tool for electricians, plumbers, carpenters and locksmiths. Ideal for installation and renovation work.

- Makes holes in wood and other soft materials twice as fast as any other drill.
- Has sharp cutting edges in three directions.
- Ideal for cutting straight or curved channels, recesses for cables and pipework and creating a mortise for locks.
- Faster drilling.
- Cleaner holes.
- Can be resharpened.

The Quick Release Drill System

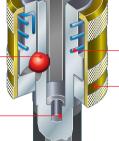

- The Snappy range is the most effective way to increase productivity for drilling and fixing.
- For use with power drills and screwdrivers and compatible with direct-drive 1/4" hex shank power bits.
- The spring-loaded Quick Chuck fitted to a drill, enables the Snappy range of tooling to be interchanged quickly.
- The most comprehensive range of quick change tooling on the

HOW DOES THE QUICK CHUCK WORK?

Ball Bearing locates in narrow neck of Snappy shanks

Recessed to allow adjustment of drill length in Snappy drill countersinks

Quick Chuck shank has 6 flats for quick and positive location in standard three iaw chuck or keyless chuck

Compression spring

Outer retracting sleeve is sprung loaded to release tools

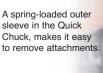

Look for this logo on your tool packaging!

Patent No. US5.398.946

The Quick Chuck is fitted into a drill, with a standard 3/8" key or keyless chuck. Six flats on the shank ensure precise location in the chuck.

Snappy attachments or any direct drive 1/4" hex bits, can then 'snap' into the Quick Chuck and are held positively in place.

QUICK CHUCKS

STANDARD QUICK CHUCK

The Snappy system starts with the Quick Chuck. This is fitted into a standard 3/8" key or keyless chuck. Snappy attachments or any direct drive 1/4" hex bits can then 'snap' in effortlessly. Six flats on the shank ensure precise location in the chuck. A sprung-loaded outer sleeve makes it easy to remove attachments.

SNAP/QC

SDS+ SHANK QUICK CHUCK

For SDS plus drills. Hammer action must be switched off when used.

SNAP/QCSDS _____

For 5/16" No. 131A Yankee® Spiral ratchet screwdrivers (large). The Quick Chuck replaces a standard bit and then enables Snappy tools to be used.

£12.50

Two extra long chucks 75mm (3") & 150mm (6") in length with smaller diameter head (18mm), to give ease of access. These two chucks will accept both direct drive and insert type bits. Can be fitted to the Quick Chuck or directly into drill chuck.

SNAPPY MAGNET QUICK CHUCK

Magnetic 50mm (2") long chuck which accepts Snappy shank fitting and Insert screwdriver bits. (Magnet will hold wood screws when used with Insert bits.)

SNAP/QCM £9.00

SNAP/QC3 (75mm) **£10.00 SNAP/QC6** (150mm) __**£11.50**

HAND-DRIVER

This Quick Chuck with sturdy plastic handle, allows the use of Snappy shank direct drive tools. Supplied with a magnetic screwdriver holder and No. 2 Pozi® bit.

SNAP/HAND/1

Comprises of a hand driver and a 31 piece bit set.

WHY AN IMPACT **DRIVER?**

Impact Drivers can reach much higher torques when compared to a traditional drill. High torques require higher current load which will drain the battery more quickly. Impact Drivers have no kickback and do not need operator to push the driver. This means less fatigue.

Ouick Change Chuck

0-3000 Impacts per **Minute for** Large Screws

Accepts a variety of Quick Change Tooling

Double LED Lights

Replacement Parts:

Switch 12v WP-T50/003 £10.75

T50/CH/12/UK £27.00 Locking Lever

For accurate guiding of routers, saws and jigsaws. **Integral clamping jaws and** a locking lever provide a quick way of clamping the quide batten.

AMP GUIDE SYSTEM

Sliding jaw has 'click' feature that allows the jaw to move freely without the metal clamp jaws catching and marking the clamp

Extra long handle

45mm wide extrusion

T-Slot track for fitting accessories

Scale included as standard

All CGS clamps will accept router base plates, saw base plates, end stop blocks and the **Optional Accessories**

£28.00

£37.50

CGS/12 305mm (12") Ideal for drill presses and saw tables.

£32.50 610mm (24")

915m (36")

£43.00 1270mm (50")

Attachment points for fitting optional jaw accessories, see below

Sawing

Use the clamp guide for accurate sawing or jig sawing of boards.

Marking Out

Ideal for marking out wide boards, using a square to ensure 90°.

Routing

The ideal guide for routing grooves and stopped grooves. The low profile of the clamp ensures that the handles of the router are not obstructed.

Gluing Up

More versatile than a sash clamp or G-clamp.

Optional Accessories for CGS & CGS/PRO only

Jaw Pads

These will give added grip on harder and smoother surfaces than the normal jaws. Supplied in a pack of four.

CGS/01_£6.00

Jaw Extension

An extension jaw for

kitchen worktops which

fits the existing fixed jaw.

CGS/03 £4.25

Horizontal Pressure Feather Board

A UHMW plastic featherboard that can be locked in position along the clamp. Can be used on router tables, drill stands etc.

CGS/HFB £29.50

Wide Jaw & Squaring **Attachment**

Allows clamp guide system to be squared up more accurately. Secured to fixed jaw. Facility to add a batten for use as a marker.

CGS/SQA + £19.50 (pre-2006)

CGS/SOA/

Spares: Metric Scale

For slide fit type clamps (pre-2006).

LUBRICANTS, CUTTER CLEANING & ADHESIVES

- Dry lubricant spray to increase sawblade and router cutter life.
- Invaluable for preventing build-up of resins on metal table surfaces, sawblades and metal tooling.

RUST BUSTER™*

Rust Protector and Lubricant Spray

- Protects cutting tools against rust.
- Cleans thoroughly to penetrate and loosen rusted components.
- Penetrating and lubricates to stop squeaking.
- Drives out water on metal surfaces.
- Frees sticky mechanisms, un-jams and lubricates.
- Ideal for spraying onto router cutter shanks and sawblades to prevent rust.

For Health & Safety Information

www.trend-uk.com

TRENDIWAXTM

Wax Lubricant

- Extends sawblade life by keeping blade cool at cutting points.
- For use when sawing aluminium.
- Use at regular intervals.
- Apply directly onto the teeth of a stationary blade.

RESIN CLEANER

Spray-on resin remover & cutter cleaning liquid

- Simply spray on and wipe off.
- Supplied in pump action dispenser.
- Ideal for sawblades, router bits, planer blades and drill bits etc.
- Corrosion inhibiting agent prevents rusting of blades whilst being cleaned.
- Liquid has dissolving properties that quickly and harmlessly removes caked on resin.

Supplied with a separate pump action dispenser.

IRRITANT (Xi)

ADHESIVE MITRE GLUE KIT*

A two part instant adhesive system

- Bonds mitres in 10 seconds.
- Can be used for bonding of MDF, rubber, PVCu, metals & most plastics.
- Two part adhesive system.
- Instant bonding properties, dramatically reduces assembly time for mitre joints.
- Comprising a cyanacrylate adhesive & aerosol activator to create instant mitre joints.

MB/KIT

(200ml activator & 50gm adhesive)

£12.00

HIGHLY FLAMMABLE (F) IRRITANT (Xi)

The world's first 3-dimensional try square. **Out performing traditional** try squares the M3Square is moved just once when marking round all four sides of a component, saving time & reducing the margin for error.

- Mark width and thickness over pre-moulded edges.
- Strike and replicate angles with integral lockable bevel gauge.
- Factory set to within a tolerance of 1/100th of 1 degree.
- Adjustable 9" Sheffield steel blade.

- **TriScribe with Pencil**
- **TriBlade Accessory Kit**

M/3**S**01

Includes:

£35.50

Integral Bevel Gauge

Mark 2 Sides at Once

Marking Gauge

ANGLEFIX™ MITRE GUI

Patent No. PCT WO 00/67969

Halves the angle for mitre joints. Use for mitre cutting of frames, skirting, architrave and beading as well as basic marking out.

- Halves angles to achieve correct cutting angle before cutting mitres.
- Use for mitre cutting of frames, skirting (not tall skirting), architraves and beading as well as basic marking out.
- Sets internal and external angles.
- Can be used with hand mitre and snipoff saws.

Position the tool in the unknown angle and the metal flag automatically halves the angle.

parallel to the metal flag.

ANGLEFIX £16.50

The result is a perfect fit.

TRISCRIBE™

The only flat lying compass in the world.

- Self supporting, giving more stability and control, reducing margin for error.
- Fits any steel or aluminium rule from 6" upwards with blade width less than 50mm.
- Unrivalled marking, mortise and panel gauge with greater range to mark deeper into the board. Can accept a pencil.
- High tolerance scribing and cutting gauge (when used with TriBlade Accessory kit).

M/TS01 £15.00

Accessory Kit TRIBLADE

Tri-Scribe. This accessory utilises hyper fine snap off dispensable blades. Scribes high tolerance parallel or curved lines.

M/TB01_£4.50

1 x Pair Scribe Points

POINT2POINT™

Design Reg. 2090984

Instantly locate positions for dowels, screws, biscuits, pins & drillings.

- 8 x stainless steel upright indicators.
- Brass pinch bolt locking mechanism.
- Designed for both left and right handed use, size range 75mm (3") to 610mm (24").

PERFECT BUTT™

Design Reg. 3014615

The world's fastest professional worktop scriber tool. It completes traditional scribing chores with precision, speed and ease.

- Quick and easy to use by remaining stable whilst scribing directly onto work-surfaces, flooring, shelves etc.
- It works by running a wheeled scribe unit along an irregular feature.
- The sprung pencil in its centre will accurately copy the profile directly onto the work-piece to be installed.
- It can then be cut and fitted to the surface resulting in a perfect butt!
- Five sizes of quick fit track wheels to cope with a variety of situations.

M/PB01

£29.00

MEASURING TAPE

Nylon coated anti-glare 19mm wide x 5 metre long bladed tape with rubberised body, bump stop cushion and brake.

Features dual imperial and metric scale and has a belt clip and wrist strap.

MT/5X19 £3.00

ANGLE GAUGE Patent Pending

- Enables external and internal angles to be read direct from a scale.
- Divides top angle in two without changing the setting.
- Ideal for measuring angles when mitre cutting large boards, fillets and architraves.

A/GAUGE £45.50

SOLID DIAMOND WHETSTONES

A range of diamond surfaced stones for sharpening, deburring or honing a wide range of tools.

- Requires less time.
- Unique construction process.
- Five year guarantee.
- Fine & coarse grades.
- Continual diamond surface.
- Diamond precision flatness, as used in the British aerospace industry.

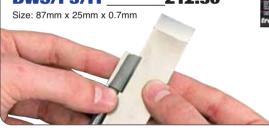

A double-sided fine pocket stone. Ideal for small tools. Supplied in a wallet.

Grade **•** •

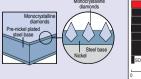

Types of Diamond

Trend: Monocrystalline diamond (Element 6 Diamond) is a single structure which does not break with use. It has an exceptional lifespan.

Other Brands: Polycrystalline diamond is a fragmented compound that breaks and wears away rapidly.

Construction

IINIUM OXIDE (Ceramic, Al2Os)

- Monocrystalline diamonds bonded through an electroless process to a precision ground pre-plated nickel carbon steel (EN43A) base.
- Double-sided, offering two grit sizes in one stone, allowing coarse sharpening and finer finishing.
- Continuous diamond surface prevents diamond and nickel lift giving more effective anti-corrosion and prevents 'snagging' on smaller tooling.

Why Trend Diamond? Fast: Hardest material. The most

efficient sharpening abrasive. Easy: Light pressure produces an

edge in seconds. Clean: Use with Trend lapping fluid to prevent rusting or clogging. Oils are

Versatile: Sharpens all hard materials including Tungsten Carbide & High Speed Steel

Durable: Stays flat & has a long life.

Grade/Grit

♦ FINE

Leaves a razor edge in a few strokes.

DOURI F

- Ideal for Cabinet Making, Carving & Tungsten Carbide tooling.
- 600 grit on P3, CC & P5 (nom. 25 micron).
- 1000 grit (nom. 11 micron) on B7 & W8F

◆ COARSE

- General joinery, HSS tooling, reshaping & rapid removal.
- 350 grit (nom. 42 micron).

Use with bench stones or workshop

Bevel edge chisels only.

DWS/HG/SET

TEMPLATES BY NUMBERS

An On-line Template Calculation System

On-line service that can help you to make templates to suit your Trend router cutters.

Offers mortise, dovetail, cabinet templates and more.

- Calculates your size of guide bush.
- Quick and easy with actual size template plan.

How it works

1. Select

You select the type of template and answer the questions on template size and features.

Calculate

The dimensions are calculated for a customised template plan.

You print off an actual sized template plan.

For more information

Visit: www.templatesbynumbers.com/trend

If your product becomes defective due to faulty materials or workmanship within 12 months of purchase, we guarantee to replace all defective parts free of charge, or at our discretion, replace the unit free of charge provided that: Proof of date of purchase is provided. The product has not been misused, abused or improperly maintained and has been used in accordance with the instructions. No unauthorised repair or modification has been made to the product. Service and/or repair of power tools and machinery is carried out by an authorised Trend Service Agent. The product was not stolen or is a counterfeit copy.

Please note: This guarantee is personal to the original purchaser and is not transferable. The guarantee is in addition to and does not affect addition to and obes not anied:
contractual rights as a professional user
or your statutory rights as a private nonprofessional user. Customers must
ensure that the product is suitable for
the purpose intended before use. Trend
cannot be held liable for any products or
unauthorized service of any product unauthorised service of any product.

We also cannot be held liable for material rendered unusable or any form of consequential loss

The information in this catalogue is for general guidance purposes only. You are responsible for determining whether it applies to your particular application. Before using our products users must read and understand all safety legislation and refer to the Provision and Use of Work Equipment Regulations (PUWER). Before using our products please read and understand all instructions provided and also refer to our Safety section in this catalogue on page 102. Trend accessories must not be put into service until it has been established that the power tool being used is in compliance with 98/37/EC (identified by the CE marking).

We are committed to reducing the impact of our products to the environment through design and process. The re-use of recycled materials reduces the demand for raw materials and helps prevent environmental pollution. Packaging and used products should be sorted for environmentally friendly recycling. We comply with all applicable laws and regulations and strive to minimise waste generation, re-use and recycle materials where possible.

Please see our website for more information and also www.recycle-more.co.uk

Recycle raw materials instead of disposing as waste.

Accessories and packaging should be sorted for environmental-friendly recycling.

Separate collection. This product must not be disposed of with normal household waste

Local regulations may provide for separate collection of electrical products from the household, at municipal waste sites or by retailer when you purchase a new product. Please call Trend Customer Services for advice as to how to dispose of unwanted Trend electrical products in an environmentally safe way or visit www.trend-uk.com

							CB PR12 For (v6.0

For further info or if your router is not listed in this chart go to www.trend-uk.com/compaitibility

This chart shows which routers are compatible with **Trend Routing Jigs & Accessories, or what** additional sub-base is required.

KEY

- ✓ The product will fit the router.
- X The product will not fit the router.
- Not applicable. The plate or sub-base is not required as the relevant jig will already fit.
- Router will fit but re-drilling of router base by user required.
- Router will fit but re-drilling of plate or sub-base by user required.

Trend will supply sub-bases already pre-drilled for an additional sum of £5 (plus vat).

Please state make and model of router when ordering pre-drilled sub-base.

- Unibase required.
- + Packing piece required.

ROD/8

One pair of 8mmØ rods ref. ROD/8X500 is required.

ROD/10

One pair of 10mmØ rods ref. ROD/10X500 is required.

For Pivot Frame Jig:

* Slight modification to router base to accept lateral fine adjuster.

For Lock/Jig:

▲ Mortising option only shown. For lock plate recess operations, a small router can be used, please refer to the Hinge Jig column for compatibilty.
