# ▶ WATCH OUR ROUTER CUTTERS

## STRAIGHTS VIDEO

Discover the versatility of straight cutters showing 40 different applications.

WATCH IT NOW!

See how they can be used for grooves and stopped housings.

Full edge planing.

Rebating or letting in glass or panels or for general rebate joinery.

## BEARING GUIDED VIDEO

For moulding & jointing of straight and shaped workpieces.

WATCH IT NOW!

See how changing the height of the cutter and the size of the bearing can alter the profile.

Stopping the moulding can create interesting effects for columns or table legs.

Also how bearing guided cutters can be used in a router table either with a backfence for straight work or without for shaped work.

## ▶ LATEST NEW VIDEOS [www.trend-uk.com/video](http://www.trend-uk.com/video)

T5 Router video features this compact and versatile router.

Letter and number template video, ideal for house numbers and signs.

The CRT/MK3 Craftsman router table video, ideal for expanding the creativity of your router.

# R VIDEO GUIDES [www.trend-uk.com/video](http://www.trend-uk.com/video)

Ideal for full lap and half lap joints,

tongue & groove joints,

mortise & tenons,

and comb joints.

Create rebates, grooves or stopped housings with a side-fence,

grooving, rebating and full edge profile planing in router tables with the backfence,

and freehand routing of nameplates.

When used portably a batten or clamp guide can be followed with the side of the router.

Use guide bushes and templates to create a perfect repeatable shaped or cut out. For straight or shaped work.

Cut complete circles or arcs with a beam trammel.

## GUIDE TO RANGES

### CRAFTPRO RANGE **TCT**

Comprehensive range of Tungsten Carbide Tipped cutters specifically designed to meet the needs of the discerning woodworker and tradesman.

SEE PAGES 86-110 CATALOGUE 2017

500 LINES

### PROFESSIONAL RANGE **TCT**

The most popular range of Tungsten Carbide Tipped router cutters in the UK. Includes superior D-Namic extended life Carbide. For the most demanding applications in the woodworking and manufacturing trades.

SEE PAGES 5-79 CATALOGUE 2017

1800 LINES

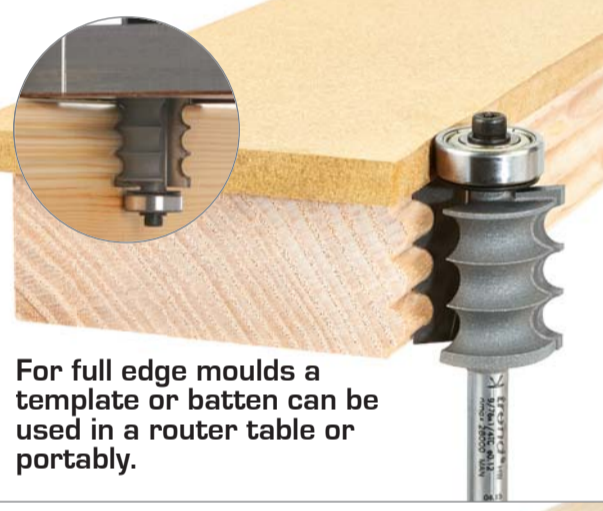

Bearing guided profilers and trimmers can be used to shape the workpiece to replicate exactly the shape of a template.

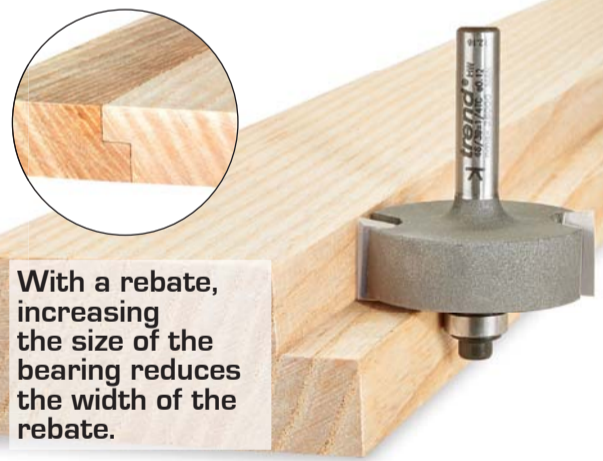

Bearing guided trimmers can be used to trim the veneer using the workpiece as the guide.

Bearings on the ends of cutters can follow the straight and shaped workpiece itself.

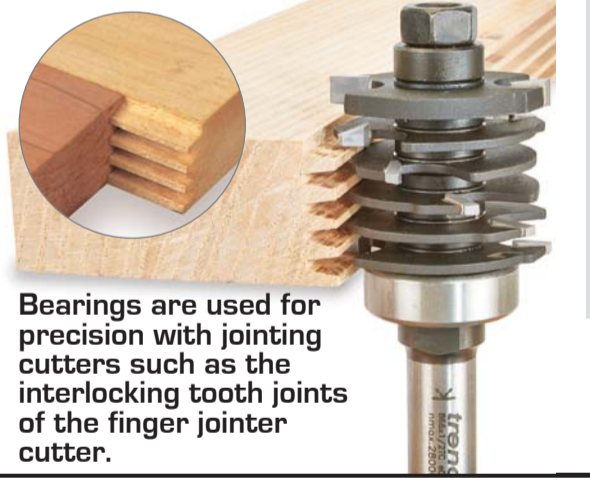

For full edge moulds a template or batten can be used in a router table or portably.

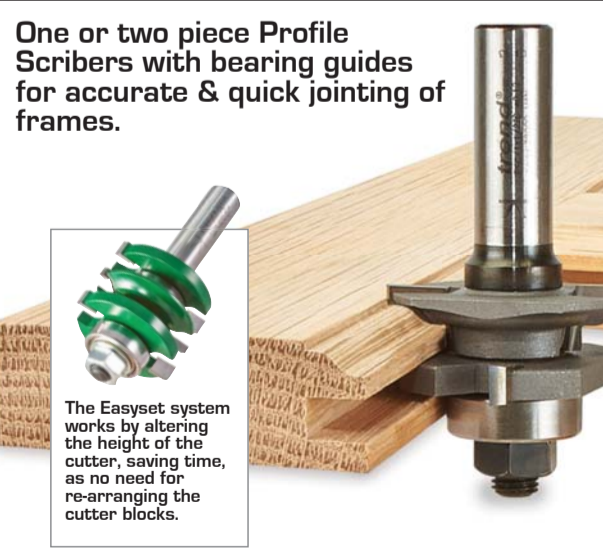

With a rebate, increasing the size of the bearing reduces the width of the rebate.

Bearings can be used on arbor systems such as the biscuit jointer which is supplied with bearings to suit the 3 sizes of biscuits.

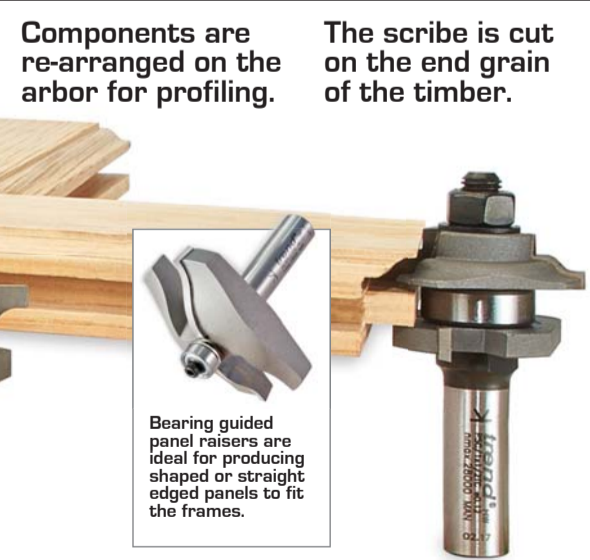

Bearings are used for precision with jointing cutters such as the interlocking tooth joints of the finger jointer cutter.

One or two piece Profile Scribers with bearing guides for accurate & quick jointing of frames.

The Easyset system works by altering the height of the cutter, saving time, as no need for re-arranging the cutter blocks.

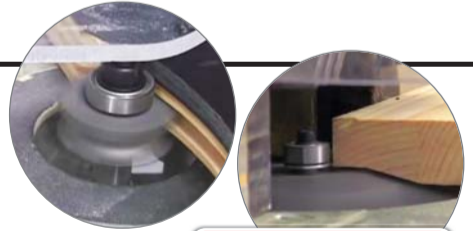

Components are re-arranged on the arbor for profiling.

The scribe is cut on the end grain of the timber.

Bearing guided panel raisers are ideal for producing shaped or straight edged panels to fit the frames.

WATCH IT NOW!

See our Profile Scriber & Panel Cutters video

The New full featured workshop WRT router table.

The New T35A professional Class M wet & dry dust extractor.

Pocket Hole Jig is ideal for precise quick joinery of frames and sheet material.

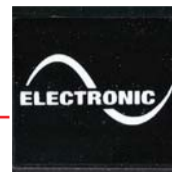

# T5 VARIABLE SPEED ROUTER

The compact, powerful and manoeuvrable Trend T5 router has a soft start variable speed 1000 watt motor that is capable of working bigger profiles and finer detailed moulds while remaining lightweight and controllable.

Complete with a micro-adjustable side-fence, it allows any routing job to be carried out with speed, ease and accuracy.

**3 YEAR WARRANTY**  
WITH ONLINE REGISTRATION

1000 watt motor, electronic variable speed with soft start feature.

The variable speed dial allows optimum control to match the cutter diameter and materials being used.

Cutters are easily changed using the built-in spindle lock.

The precision nut & collet assembly can be exchanged for the optional 8mm size.  
Ref. CNS/T5/8 £18.85 Exc. VAT

The fine control of the micro-adjustable side-fence ensures accurate results. The fence is guided by the edge of the workpiece.

The plunge can be controlled with the adjustable depth stop.

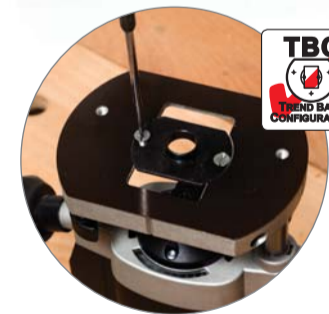

Used with the turret, the depth stop allows accurate inlays and depth setting.

For fine control a fine height adjuster is available.  
Ref. FHA/001 £15.25 Exc. VAT

The low profile dust spout clips easily into the router base.

Guides bushes fit directly to the base for jig and template work. 35 different diameter sizes are available.

For full details see

# IMPORTANT SAFETY PRACTICES

Always read the instructions that come with your routers and cutters to ensure you are following safe working practices.

Before making adjustments to the router or changing a cutter, always remove the plug from the socket first. Ideally mark the plug with the word 'router' to ensure you pull the right plug.

Ensure when fitting the cutter you insert the shank until at least the 'K' mark on the shank. This will prevent vibration and/or damage to cutter or router.

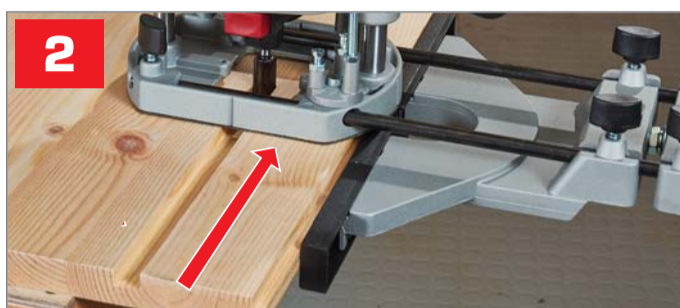

Always wear safety eyewear to ensure you protect your eyes from flying debris and a face mask to stop the inhalation of fine dust particles. Ear defenders are also advisable.

# FIRST STEPS TO GETTING STARTED

**1** First run a bearing guided edge mould around the outside of a square piece of material or against a long edge. Keep the router flat on the work and the bearing tight to the edge and feed at a steady rate.

**2** Practice using the fence by making a rebate and a continuous groove. Close the fence cheeks. Keep firm pressure at the leading edge of the fence as the cut starts. Towards the end transfer pressure to rear of the fence.

**3** Using the fence, practice plunge stopped grooves. First set cut depth with depth stop. Plunge router into the work keeping firm pressure against the fence, move smoothly until you reach the stop point and release the plunge.

**4** Using the V groove cutter, practice freehand engraving & sign writing. Set a minimal depth of cut with the plunge stop. First sketch in pencil the lettering required taking into account the thickness of cut you will make.

**5** The V groove & fence are used to good effect to make false panels. Use the fence to rout the outer edges to give the effect of a frame & then adjust it to make the infill panel lines by using the plunge to start & stop the cuts.

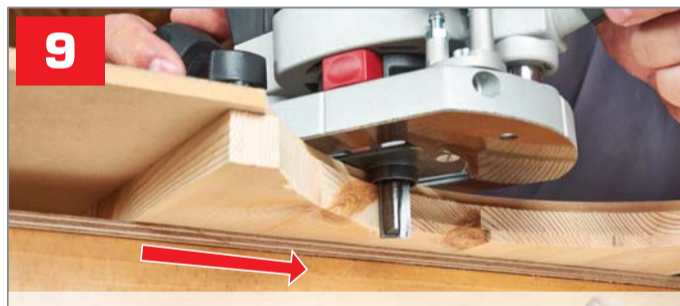

**6** Making grooves beyond the reach of the fence is easy to achieve by clamping a batten as a guide and running the router against it. Mark up the position of groove required and position the batten appropriately.

**7** Cut a circle by fixing the trammel guide to one fence rod. Mark the centre and radius of the circle. Using the straight cutter, position trammel on the centre point and adjust the fence rod until the inside edge of the cutter is against your mark. Keep firm pressure on trammel point to prevent it lifting.

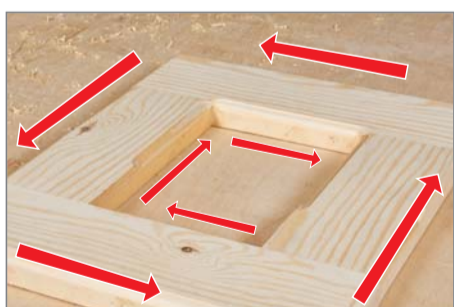

**8** Using a bearing guided moulding cutter, rout a mould around the edge of the circular blank. Move in an anti-clockwise rotation keeping pressure directly over the workpiece as you work to prevent tipping.

**9** Templates can be easily made from 6mm MDF for replicating shapes. Ensure any edge the guide bush has to follow is smooth as any roughness will be replicated in the finished workpiece. Secure the template to the work and keep the guide bush tight to the template.

# TIPS & ADVICE TO GET IT RIGHT

For internal moulding or template work, feed the router in a clockwise direction. For outside work feed in an anti-clockwise direction.

For deep grooves or edge work, take repeated passes to prevent motor overload.

Keep the weight over the workpiece to prevent router tipping.

Plan the order of cuts to prevent breakout. Rout the cross grain edge before the long grain edge.

Ensure an even feed speed to prevent burning. Burn marks often happen when the user repositions themselves, so the router path should be planned in advance. With experience the cutter can be pulled away from the workpiece at the crucial points to prevent burning. To remove burning a second pass can be made.

# TAKE YOUR ROUTER FURTHER

## 6 PIECE SET 1/4" SHANK

For decorative woodworking, such as grooving, profiling and moulding. Includes three self-guided cutters for straight and shaped work.

Product Ref.  
**SET/SS11X1/4TC**  
**£21.69**

**TCT**

SEE PAGES 112 & 114  
CATALOGUE 2017

## 24 PIECE SET 1/4" SHANK

Contains a range of widely used cutters for decorative woodworking.

Product Ref.  
**SET/SS24X1/4TC**  
**£70.60**

**TCT**

## 30 PIECE STARTER SET 1/4" SHANK

Cutter set aimed at those new to routing. To be used for a variety of woodworking applications on timbers and man-made timber based boards. Fifteen unguided and fifteen guided cutters.

Product Ref.  
**SET/SS31X1/4TC**  
**£84.90**

**TCT**

SEE PAGE 2  
CATALOGUE 2017

## DIGITAL DEPTH GAUGE

LCD depth gauge for setting tool height in a plunge router, router table and saw bench.

Product Ref.  
**GAUGE/D60**  
**£21.91**

SEE PAGE 187  
CATALOGUE 2017

## FINE HEIGHT ADJUSTER

Fine height adjusters simply fit onto the router and allow fine adjustment of the cutter height.

Product Ref.  
**FHA/001** (for T5)  
**£15.25**

SEE PAGE 185  
CATALOGUE 2017

## LETTER & NUMBER TEMPLATES

Clear plastic letter and number templates for routing signs including house names and numbers. The templates are used with a 13mm guide bush and 8mm diameter cutter. Letters are uppercase and all characters are nominal 57mm high.

Product Refs.  
**TEMP/NUC/57**  
**£21.68**  
(numbers)

**TEMP/LUC/57**  
**£43.47**  
(letters)

Cutter & Guide Bush Set  
Ref. **TEMP/LN57X1/4** **£15.25**

## VARIJIG SELF CLAMPING GUIDES

Self clamping, straight line clamp guides that use the Varijig low profile extrusion.

Product Refs.  
**VJS/CG/24** (610mm)  
**£30.39**

**VJS/CG/36** (915mm)  
**£36.00**

**VJS/CG/50** (1270mm)  
**£41.64**

SEE PAGE 210  
CATALOGUE 2017

## LARGE COMPASS

A router compass used for cutting circles and arcs from 100mm up to 610mm radius.

Product Ref.  
**R/COMPASS/A**  
**£45.18**

SEE PAGE 174  
CATALOGUE 2017

## OFFSET BASE

This teardrop shaped base is fitted to the router to allow better control when edge moulding by preventing router tilt.

Product Ref.  
**OFS/BASE**  
**£30.15**

SEE PAGE 179  
CATALOGUE 2017

## DOVETAIL JIGS

Two accurate and easy to use Dovetail Jigs for a variety of elegant joints. Cuts pins and tails in one operation.

Product Refs.  
**CDJ300** (300mm)  
**£119.89**

**CDJ600** (600mm)  
**£204.66**

SEE PAGE 148  
CATALOGUE 2017

## CRAFTPRO ROUTER TABLE

The CraftPro router table will suit craftsmen and woodworking enthusiasts. It is packed with features to maximise the versatility of all popular portable routers. Table top 610 x 405mm.

Product Refs.  
**CRT/MK3** (240v)  
**£223.90**

**CRT/MK3L** (115v)  
**£253.71**

SEE PAGE 139  
CATALOGUE 2017

## AIRSHIELD PRO

Powered respirator for all woodworking applications with built-in fan and protection shield.

Product Ref.  
**AIR/PRO**  
**£224.97**

SEE PAGES 136 & 137  
CATALOGUE 2017

## DUST MASK RESPIRATOR

With replaceable filter system, ideal for use when routing.

Product Ref.  
**AIRACE**  
**£38.76**

## T31A LIGHT DUTY WET & DRY VACUUM EXTRACTOR

Semi-professional wet and dry dust extractor with power tool take off, for hobbyist, DIY and light trade use. Large 35 litre capacity with 7 metre long power cable and 5 metre extra long hose.

Product Ref.  
**T31A** (230v, 1400W)  
**£190.77**

SEE PAGE 134  
CATALOGUE 2017

## MULTI-FUNCTIONAL COMBINATION ROUTER BASE

Quick fitting, multi-functional router base. Fits most routers with 8mm, 10mm and 12mm diameter rods at 78mm to 130mm centres.

Product Ref.  
**CRB**  
**£77.64**

SEE PAGE 173  
CATALOGUE 2017

## MINI ELLIPSE & CIRCLE CUTTING JIG

This jig is ideal for routing elliptical picture frames, mirrors, clocks and small tables etc. Maximum circle diameter is 600mm.

Product Ref.  
**ME/JIG**  
**£119.89**

SEE PAGE 175  
CATALOGUE 2017

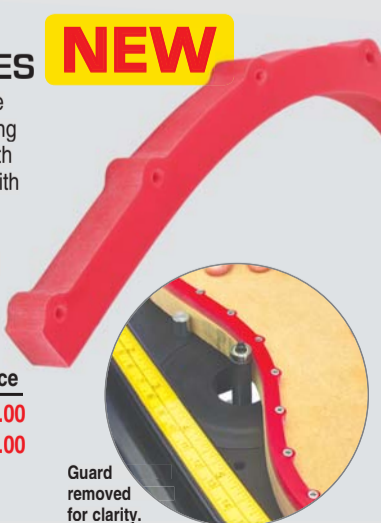

## FLEXIBLE CURVE GUIDE TEMPLATES

An 8mm thick mini flexible curve used to make templates, enabling a shape to be cut repeatedly with precision. Use in conjunction with a self-guided cutter in a router. Alternatively a standard cutter can be used with a guide bush. Includes fixing screws.

Product Ref. Length Price  
**CURV/8X500** 500mm **£27.00**  
**CURV/8X1000** 1000mm **£52.00**

SEE PAGE 3  
CATALOGUE 2017

## MORTISE & TENON JIG

Enables mortise and tenons and dowel joints to be cut with a router. Ideal for cabinet, chair and table construction. One set-up for both mortise and tenon giving perfectly fitting joints.

Product Ref.  
**MT/JIG**  
**£216.75**

SEE PAGE 147  
CATALOGUE 2017

## BUTT HINGE TEMPLATE

A routing template that allows a router to create a hinge recess on a door. For 75mm and 100mm hinges.

Product Ref.  
**TEMP/BH/A**  
**£42.62**

## WORKSHOP ROUTER TABLE

The WRT will suit craftsmen and woodworking enthusiasts. It is packed with the necessary features to maximise the versatility of all popular portable routers.

Product Ref. **WRT** (240v)  
**£399.00**  
SEE PAGE 1  
CATALOGUE 2017

Check our website for compatibility with your router.

**Two insert rings** in sizes 31.8mm & 67.5mmØ to suit different cutter diameters.

**Insert plate** includes hole for the T11's Quick Raiser fine height adjuster with park position at rear of fence.

**Finger pressure guard assembly** fully adjustable.

**57mmØ (2-1/4") Dust spout aperture**

**Optional hose with adaptor** is available, 39mmØ x 3m with 57mmØ (2-1/4") adaptor. Ref. **CRT/4** £22.89

**Lead-on pin** for safe moulding with bearing cutters. Park position at rear of fence.

**Adjustable cheeks** with full edge planing attachments. 1.4mm and 2.4mm widths.

**Aluminium backfence** Quick release with adjustable cheeks and planing facility.

**Optional down pressures** (pair) available for machining longer lengths of timber. Ref. **WRT/1** £14.95

**Aluminium insert plate** with TBC fittings. **98mmØ Aperture** for large panel raiser cutters.

**Mitre fence** with zeroing and splach block facility.

**Optional pushblock** for scribing rails. Ref. **PUSHBLOCK/4** £53.40

**T11 Quick release fixing holes** allow T11 to be fitted to the table quickly when used with optional Quick release kit.

**T11 Quick release kit** Ref. **T11/JT/KIT** £27.97

**No-volt release switch** easy safe access to switch router on/off.

**Optional limit stop** available for stopped moulding & grooves. Ref. **WRT/2** £14.95

**Neat cable storage**

**Side finger pressure**

**Bench Weight** 27.5 Kg

**MDF table top** 804mm x 604mm Height 890mm

**Pushstick** supplied with park location.

**Adjustable feet** for uneven surfaces.

**Optional castors** (4 off) available for ease of movement. Ref. **WRT/3** £29.95

## DUST EXTRACTOR

Wet and dry dust extractor with power tool take off for professional use. 27 litre capacity with extra long 7 metre power cable and 5 metre long hose with blower facility. Rated dust category Class M to maintain a clean and safe working environment. Includes floor cleaning kit.

SEE PAGE 1  
CATALOGUE 2017

**Powerful motor** providing an airflow of 4,200 L/min.

**Capacity** 27 litres (dry). Weight 7.5kg.

**Adaptors, floor cleaning tubes & spouts** for wet & dry applications.

Product Refs.  
**T35A** (230v, 1400W) **£349.00**  
**T35AL** (115v, 800W) **£379.00**

**Large rear castors** for extra stability.

**Extra long hose** 5 metre x 39mmØ.

Power take-off socket maximum 2200w (240v).

Optional dust spout adaptor for WRT, CRT & PRT tables. Ref. **CRT/3** £11.51

Automatic & manual shaker facility to clean filter.

Easy filter removal plus additional foam filter for sucking up water.

Easy fit bag with full bag closure system.

Product Ref. DWS/CP8/FC

£89.45

Size: 203 x 75 x 8mm.  
Fine 1000 grit, coarse 300 grit.

# SAWBLADE COMPATIBILITY

[www.trend-uk.com/compatibility](http://www.trend-uk.com/compatibility)

The new Sawblade Compatibility option on our website lists all models of saw machines for correct selection from our CraftPro and Professional Sawblade Ranges.

## CHOOSE THE RIGHT BLADE

### RIP

These blades have the least number of teeth for the diameter, i.e. 250mm, 24 teeth (24T). These are used for cutting with the grain in natural timbers, such as cutting down the length of a board or a baulk of timber.

### GENERAL PURPOSE OR COMBINATION

These have more teeth for the diameter. A 250mm blade would have around 40 teeth (40T). These blades can be used for all types of cutting in natural timbers, however you will not achieve the best results possible.

### CROSSCUT OR TRIMMING

Again, more teeth for the diameter eg. 250mm X 60T. Used for cutting natural timber across the grain, creating a smooth, tear free cut. Can also be used for ply and all other man-made boards.

### FINE TRIM/FINISH

Sometimes known as an Extra Fine blade, these have the most teeth (eg. 250mm x 80T) and will give the cleanest possible cut across the grain in natural timbers. These are especially good for sizing panels.

### THIN KERF

These are much thinner in section and are best suited to mitre or chop saws that have no riving knife or cordless saw. The thin blade section means that much less material is removed during the cut and so less power is required.

### NEGATIVE RAKE

Perfect for use on mitre saws and radial arm saws, the negative rake angle of the tooth prevents the blade from 'climbing' over the work. The cut entry is much softer which makes the machine safer to use.

## PLUNGE SAWBLADES

Designed for demanding professional and industrial applications using wood and wood based materials.

FOR FULL RANGE  
SEE PAGES 122-128  
CATALOGUE 2017

## DIGITAL LEVEL BOX

Find the angle on a surface quickly and accurately. With its magnetic base and LCD backlight, this level box is ideal for table and mitre saws.
