A BLADE SOLUTION FOR EVERY MACHINE

PROFESSIONAL & CRAFTPRO SAWBLADES

A range of Tungsten Carbide Tipped sawblades designed for professional finish in softwood, hardwood, hardboard, plywood & particle board.

High Grade Steel Plate

Tungsten Carbide Tipped

Precision Bore

High Performance & Long Life

Designed for a professional finish in wood, MDF, particle board, hardboard & plywood

Blade sizes from 85mm to 350mm catering for cordless trim saws to bench saws

EXPANSION SLOT
This allows the blade to expand as it heats up while cutting therefore prevents warping.

DIAMETER

This symbol denotes the diameter of the blade.

PITCH

The distance from tooth point to tooth point.

BORE

The diameter of the hole at the centre of the blade.

DIRECTION

This shows the cutting rotation of the blade.

TOOTH TIP/TYPE
Teeth shape vary to suit material being sawn.

TOOTH
The number of teeth on a blade will impact the speed and finish of the cut.

KERF
Width of slot created by the tooth.

PCD SAWBLADES

For use on cement fibreboard & tool-wearing material eg. laminate, solid wood & ultra hard materials.

60x LONGER LIFE COMPARED TO TCT ON LAMINATE FLOORING

High Grade Steel Plate

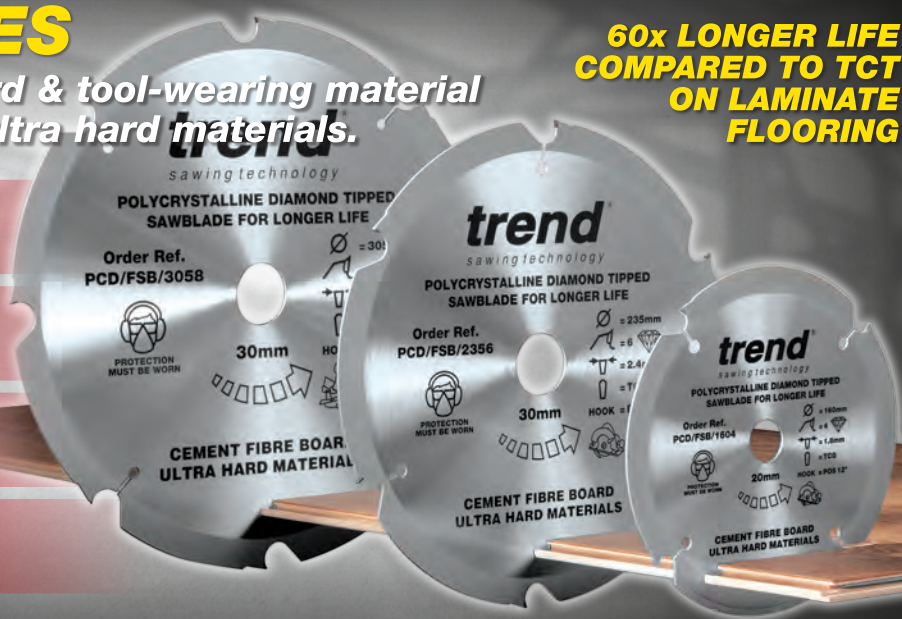

Precision Bore

Polycrystalline Diamond Tipped

Reduced Vibration

COLOUR LABEL DENOTES BLADE GROUP FOR EASY SELECTION OF BLADE FOR CORRECT FINISH ON MATERIAL & TYPE OF SAWING MACHINE USED
