

CNC MACHINING

A RANGE OF PROFILE & STRAIGHT MACHINING BITS IN A WIDE RANGE OF MEASUREMENTS

INCLUDING:

- Router bits made from Solid Carbide.
- Router bits with Tungsten Carbide disposable knives.
- A unique system of router bits - different profile knives that are assembled on a single body.

OUR RANGE OF SOLID CARBIDE SPIRAL BITS FEATURE:

- **DYNAMIC** Carbide.
- Unique grinding process.
- Extreme durability and long life in solid wood and abrasive board.
- High wear Carbide developed exclusively with the world's leading Carbide manufacturer.
- More precise automated grinding processes that further improves the Carbide's resistance to wear.
- Up to 200% the lifetime even when working with abrasive materials.
- The most cost effective Carbide available today.

Technical Information	115
Grooving & Sizing	116 - 123
Profiling & Chamfering - 20mm Shank	124 - 126
Jointing & Rebating - 20mm & 25mm Shank	126
Frame & Panel Door - 20mm Shank	127 - 129
Multi Profile - 20mm Shank	129
Engraving & Carving	130 - 132
V-Grooving - 12.7mm Shank	132 - 133
Ball Grooving - 12.7mm Shank	133
Profile Scribing - 12.7mm Shank	134
Raised Panelling - 12.7mm Shank	135 - 137
Tongue & Grooving - 12.7mm Shank	138
Tool Holders & Pullstuds	139
ER Collets	140
Adjustable Assembling Device	140
