

# SPINDLE TOOLING

**These cutters meet all the requirements of the modern woodworking industry. They include multi profile cutter heads with tool steel and Tungsten Carbide knives, Tungsten Carbide brazed tip tooling and disposable insert tooling.**

**Disposable insert tooling brings the following benefits:**

- A clean and accurate cut.
- Harder carbide grade than standard brazed tip tooling as no heat is used in the manufacturing process.
- Quick to set up.
- Saves tooling costs.
- No re-sharpening costs.
- Profile always remains the same.
