

# Router STUFF

This month **Anthony Bailey** tries out some handy stuff for the router user

## Trend Cutter & Collet Care Kit

THE BUSINESS END of a router is the collet and the cutters that fit into it. Proper maintenance of these is essential for safe working and long operational life.

Trend offer a Cutter & Collet Care Kit for just this purpose.

It includes a 40ml can of PTFE dry lubricant to keep cutting edges clear of resin build up, which maximises tool life, a 40ml can of Rustbuster which prevents corrosion and dispels moisture, a DMT mini diamond hone, and a concertina water bottle for lubricating the diamond hone. There are four brass bristle brushes for scrubbing 8mm,  $\frac{1}{4}$ in,  $\frac{3}{8}$ in and  $\frac{1}{2}$ in collets, and last but not least, an invaluable 56 page guide covering every aspect of cutter & collet care. Subjects include cutter types, cutter speeds, how different types of damage occur, machining techniques, router and cutter maintenance and much more besides.

■ Price: £ 18.39 including VAT, from stockists.

For more information ring the Literature Hotline on 0800 4 TREND (0800 487363).
