Alan Goodsell gets the measure of a starter cutter set

Trend 12-piece starter set

THE RANGE of profiles in the 12-cutter set is plentiful and well selected to give the beginner a full range which allows many more profiles to be created either by only using part of a cutter or building up profiles using more than one cutter.

The set includes two straight cutters, one 6.3mm and the other 12.7mm diameter, a 12.7mm diameter bearing-guided trimming cutter, a 28mm diameter bearing-guided rebate cutter, a V-grooving cutter, a 12.7mm diameter core box cutter, a 22mm diameter bearing-guided cove cutter with a 6mm radius, a bearing-guided ogee cutter, a bearing-guided rounding-over cutter with a 6.3mm radius, a bearing-guided rounding over cutter with a 10mm radius, a 12.7mm

dovetail cutter and a bearing-guided chamfer cutter.

The cutters are all well made and will stand up to the demands of a beginner, especially if well looked after. They are available with either a 1/4in or 8mm diameter shank and come in a nicely made wooden box.

Buying a set of cutters is cheaper than buying the same cutters individually, although some cutters may not get used so often.

Also included is Trend's illustrated booklet *A Guide to Getting Started*.

■ Price: £82.19 including VAT.
