

T5V2 1000W ROUTER

MANUFACTURER: Trend

AVAILABLE FROM: Trend stockists

PRICE: Around £225

The brand new improved Trend T5 router has just made it into this issue. We're usually the first people to shout about leaving things alone – if it ain't broke and all that... Well, this is not an all-change situation. Trend have just up-dated the T5 and what a difference a few changes can make. The new features include soft-grip handles, a new button spindle lock, a larger 1000W motor (upgraded from the previous 850W model), and improved electronic speed control. In the hour or so that we've had to take a preliminary look at the router, first impressions are good. We'll bring you more on this one next month...
