4. OPERATION

- 4.1 To avoid “mushrooming”, use a copper or a hard rubber mallet to drive the panel separators, items 1 through 6.
- 4.2. Items 1 through 6 generally used for separating sheet metal laminates, bonded or spot welded together. Use the prise bar end of items 7 through 11 to start the separation if required.
NOTE! It is the action of the drift angle, or wedge, which separates the laminates, not the leading straight or radiussed edge. These tools are **NOT** chisels.
- 4.3. Use the panel slapper tools, items 7 through 13 in conjunction with an appropriate dolly (not supplied in this kit). Use to form or remove 3 dimensional shapes in bodywork and sheet metal products.

5. MAINTENANCE

- 5.1. Keep the tool working surfaces smooth, with a finishing cloth or draw file.
- 5.2. Clean the tools with a lightly oiled cloth and return to the carry case. Store indoors, away from children.

Environmental Protection

Recycle unwanted materials instead of disposing of them as waste. All tools, accessories and packaging should be sorted, taken to a recycling centre and disposed of in a manner which is compatible with the environment. When the product becomes completely unserviceable and requires disposal, drain off any fluids (if applicable) into approved containers and dispose of the product and the fluids according to local regulations.
