

Thank you for purchasing a Sealey product. Manufactured to a high standard this product will, if used according to these instructions and properly maintained, give you years of trouble free performance.

IMPORTANT: PLEASE READ THESE INSTRUCTIONS CAREFULLY. NOTE THE SAFE OPERATIONAL REQUIREMENTS, WARNINGS & CAUTIONS. USE THE PRODUCT CORRECTLY AND WITH CARE FOR THE PURPOSE FOR WHICH IT IS INTENDED. FAILURE TO DO SO MAY CAUSE DAMAGE AND/OR PERSONAL INJURY AND WILL INVALIDATE THE WARRANTY. PLEASE KEEP INSTRUCTIONS SAFE FOR FUTURE USE.

1. SAFETY

1.1 GENERAL

- ✓ Ensure the torch is correctly charged before initial use.
- x **DO NOT** turn the torch on when it is being re-charged.
- x **DO NOT** shine directly into your, other person's or animal's eyes.
- x **DO NOT** allow children to use the torch.
- x **DO NOT** handle or move the torch whilst it is being charged.
- x **DO NOT** use the torch if you suspect that the battery or the torch casing is damaged.
- x **DO NOT** leave battery in a discharged state, recharge battery immediately. If the torch is not in use, recharge the battery every month.

1.2 ELECTRICAL SAFETY FOR USE OF CHARGER. **USE ONLY THE SUPPLIED CHARGER PLUG FOR CONNECTING TORCH TO THE POWER SUPPLY.**

- ☐ **WARNING!** It is the user's responsibility to read, understand and comply with the following electrical instructions:

You must ensure the risk of electric shock is minimised by the installation of appropriate safety devices. An RCCB (Residual Current Circuit Breaker) should be incorporated in the main distribution board. We also recommend that an RCD (Residual Current Device) is used with all electrical products, particularly portable equipment which is plugged into an electrical supply not protected by an RCCB.

You must also read and understand the following instructions concerning electrical safety.

- 1.2.1 **The Electricity At Work Act 1989** requires all portable electrical appliances, if used on business premises, to be tested by a qualified electrician, using a Portable Appliance Tester (PAT), at least once a year.
- 1.2.2 **The Health & Safety at Work Act 1974** makes owners of electrical appliances responsible for the safe condition of the appliance and the safety of the appliance operator.
If in any doubt about electrical safety, contact a qualified electrician.
- 1.2.3 **You must ensure that you:**
 - ✓ Inspect the charger plug, cable and connector for wear and damage to ensure items are safe before connecting to the mains power supply. If worn or damaged **DO NOT** use.
 - ✓ Important: Check that the voltage marked on the charger plug is the same as the power supply to be used.
 - ✓ Uncoil the cable between charger and the torch.
 - x **DO NOT** pull the charger plug from the mains socket by the lead.
 - x **DO NOT** use any other type of charger with this product.
 - x **DO NOT** try to take the charger plug apart.
 - x **DO NOT** use the charger plug to charge or power any other electrical item.
 - x **DO NOT** get the charger wet, or use in wet, damp conditions (for indoor use only).
 - ☐ **WARNING! NEVER** substitute a standard 13amp 3 pin plug, or any other type of plug, for the charger plug.

2. INTRODUCTION

Robust housing offering superb durability to help prevent damage to unit. Featuring Thirty six super bright LEDs. Thirty LEDs used as an inspection lamp or Six LEDs in the end for use as a directional torch. Single LED battery indicator. Smooth rocker switch for turning unit on/off. 360° Swivel hanging hook for hands free applications. Supplied with mains and 12V in-car chargers.

3. CHARGING

IMPORTANT WARRANTY INFORMATION:

The battery fitted to this lamp is considered to be a consumable item and its ability to accept charge will reduce over time. We will warranty it against mechanical and electrical defect for a period of one year - this does not cover fair wear and tear. If the battery is not properly charged before first use, or regularly conditioned, its capacity will diminish. Under these circumstances we will not replace the battery even if it is less than one year old.

3.1 MAINS: Make sure the torch is switched off before commencing charging.

3.1.1 Plug the charger into the charging socket at the base of the torch.

3.1.2 Plug the transformer plug into the mains supply.

3.1.3 Whilst the torch is charging the bottom LED will light up red.

3.1.4 When charged unplug the charger from the mains supply. Unplug the charging lead from the torch.

3.2 VEHICLE PLUG:

3.2.1 Ensure lamp is turned off and then plug the 12 Volt vehicle plug adaptor into the jack inlet on the lamp.

3.2.2 Insert 12V adaptor into vehicle cigarette lighter socket.

3.2.3 When fully charged, unplug the adaptor from the vehicle socket and from the lamp before turning on.

3.2.4 Store the adaptor in a safe, dry location.

NOTE: Charging the lantern from a 12 Volt vehicle socket will drain the vehicle battery.

NOTE: Some vehicles require the ignition to be on to provide power to the cigarette lighter socket.

NOTE: To maintain battery, charge monthly if lamp is not in use.

4. OPERATION

4.1 Switch the torch ON & OFF using the rocker switch in base of torch. Direct the lens away from your eyes before switching on.

4.2 Use the rocker switch to select between the six LED's to use as a torch or the 30 LED,s to use as inspection lamp.

4.3 To suspend the torch, unclip the hanging hook from behind the top of the light and hinge it upwards. When the light is hanging from it's hook it can be rotated through 360° for more precise positioning.

NOTE: LED arrays are designed to allow individual LEDs to cease functioning without causing the entire array to fail. This could be as a result of shock or impact. Shock or impact will invalidate warranty.

Environmental Protection

Recycle unwanted materials instead of disposing of them as waste. All tools, accessories and packaging should be sorted, taken to a recycle centre and disposed of in a manner which is compatible with the environment.

When the product is no longer required, it must be disposed of in an environmentally protective way.

Battery Removal

1. For battery removal remove all the screws on the rear of the casing.
2. Split the casing in two, revealing the battery.
3. Cut the negative wire then the positive to remove the battery from the lamp.
4. **Dispose of battery according to local authority guidelines.**

Under the Waste Batteries and Accumulators Regulations 2009, Jack Sealey Ltd are required to inform potential purchasers of products containing batteries (as defined within these regulations), that they are registered with Valpak's registered compliance scheme. Jack Sealey Ltd's Batteries Producer Registration Number (BPRN) is BPRN00705

NOTE: It is our policy to continually improve products and as such we reserve the right to alter data, specifications and component parts without prior notice.

IMPORTANT: No liability is accepted for incorrect use of this product.

WARRANTY: Guarantee is 12 months from purchase date, proof of which will be required for any claim.
