The battery fitted to this lamp is considered to be a consumable item and its ability to accept a charge will reduce over time. We will provide warranty against mechanical and electrical defect for a period of one year - this does not cover fair wear and tear. If the battery is not properly charged before first use, or regularly conditioned, its capacity will diminish. Under these circumstances we will not replace the battery regardless of whether it is less than one year old.

**Note:** The lithium battery does not suffer from memory effect and once fully charged may be stored for up to six months without another charge.

## 4. OPERATION

- 4.1. Connect the USB lead to the rear of the lamp. Plug into USB power supply and turn on, the charging LEDs on the lamp will flash green to show that charging has commenced.
- 4.2. The number of green lights flashing indicate the level of charge.
- 4.3. When the battery has charged fully all the LEDs will show steady green.
- 4.4. Direct the lens away from your eyes before switching on.
- 4.5. Toggle the lamp between the end light and side light using the ON/OFF switch.
- 4.6. The output of the side LED can be varied by pressing the switch a further time.
- 4.7. The lamp may be suspended by the hooks or attached to any ferrous surface by using the magnets. When the light is hanging from the hook it can be rotated through 360° for more precise positioning.
- 4.8. Separate the top and bottom sections by pulling apart. When attached to a ferrous surface, using the base magnet, the lamp can be rotated to shine in any direction.
