

TIMING BELT TENSIONER ADJUSTER VW GROUP VEHICLES

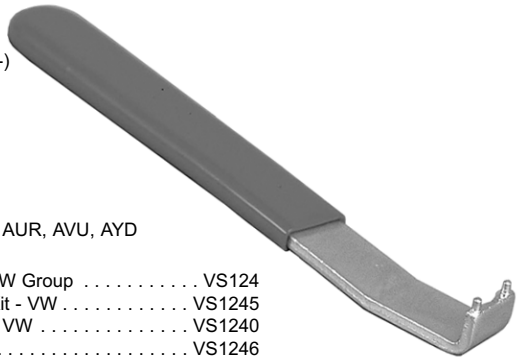

1. INTRODUCTION & APPLICATIONS

1.1. INTRODUCTION

The timing belt tensioner on most VW Group diesel and petrol engines is adjusted by means of specialised 'two pin' wrenches which locate in two holes in the belt tensioner. Many engines are covered by the Tensioner Adjusters included in the Engine Setting/Locking Kits VS124 and VS1245, but a new group of VW petrol engines require an additional Adjuster and VS12473 is introduced to cover these applications.
