## 1. SAFETY

- **WARNING!** Ensure Health and Safety, local authority and general workshop practice regulations are adhered to when using tools.
- WARNING! Always use caution when working around fuel systems. The fuel in the fuel rail may be pressurised even if the engine is not running.

**IMPORTANT:** These instructions are provided as a guide only. Always refer to the vehicle manufacturer's service instructions, or a proprietary manual, to establish the current procedure and data, also any warnings or cautions particular to the vehicle.

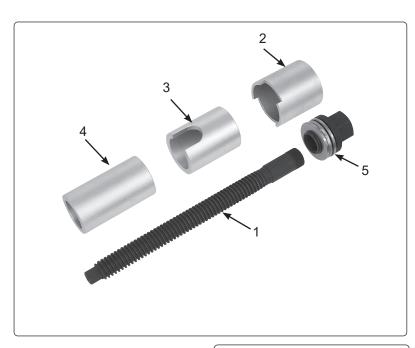

- DO NOT use the set if any parts are missing or damaged.
- DO NOT use this tool for any purpose other than that for which it is designed.
- ✓ Switch off the vehicle's ignition and disconnect the battery before commencing work under the bonnet.
- DO NOT lay tools on the vehicle's battery. This may short the terminals together, causing harm to yourself, the tools, or the battery.
- ✓ Operate in a well ventilated area. **DO NOT** inhale fuel vapours.
- ✓ Wear approved eye protection. A full range of personal safety equipment is available from your Sealey stockist.
- ✓ Wear suitable clothing to avoid snagging. DO NOT wear jewellery and tie back long hair.
- √ Keep children and other unauthorised persons away from the working area.
- ✓ Keep yourself, tools, and test equipment away from hot engine parts.
- ✓ Always keep a fire extinguisher that is suitable for fuel/electrical/chemical fires close by.
- **DO NOT** smoke or have open flames near vehicle.
- ✓ Cover fuel line fittings when connecting or disconnecting fuel lines to guard against high pressure leaks. Avoid contact with fuel.
- ✓ Clean up all fuel spills immediately and dispose of all waste according to local regulations.
- ✓ Maintain the tool components in good and clean condition for best and safest performance.
- ✓ When work on the vehicle is finished, ensure all connections on the vehicle are restored, and that there are no tools left in the engine bay.
- Replace tools in the carrying case and store in a safe, dry, childproof location.

## 5. OPERATION

NOTE: Ensure you have read, understood and applied the directions in the Safety section

- 5.1. Disconnect fuel and electrical connections to the injector.
- 5.2. Place Removal Socket (fig. 1.3) and using a suitable ratchet drive unscrew and withdraw the upper section of the injector.
- 5.3. Place the Pulling Spindle carefully into the remaining injector unit and screw it in until fully engaged with the injector.
- 5.4. Place the relevant Support Sleeve (fig.1.4, fig.1.2) over the spindle and slide it carefully down onto the cylinder head.
- 5.5. Screw the Shoulder Nut (fig.1.5) down to the Support Sleeve and using a suitable spanner tighten the Shoulder Nut down in order to withdraw the remainder of the injector unit.
