Section 5. Fire Fighting Measures.

5.1. Extinguishing media

Use extinguishing media appropriate to the surrounding fire conditions.

Water spray, dry chemical or carbon dioxide.

Sand may be used for small fires.

5.2. Special hazards arising from the substance or mixture

Inhalation of the flux fumes given off at soldering temperatures will irritate the nose and throat. The fumes produced by rosin may cause sensitisation by inhalation. Temperatures above 500°C may produce vapours or fumes that, on cooling, may condense as heavy metals dust. Lead is harmful if absorbed into the body and can cause birth defects and other reproductive harm.

5.3. Advice for fire-fighters

Wear full protective clothing and self-contained breathing apparatus.

Section 6. Accidental Release Measures.

6.1. Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation of the working area.

Avoid inhalation of fumes from hot solder.

Avoid contact with hot product and wash hands after handling and before eating, drinking or smoking.

6.2. Environmental precautions

Do not allow product to enter drains, soil, waterways and sewers.

6.3. Methods and material for containment and cleaning up

Remove with broom / shovel.

Keep in appropriate closed container for disposal.
